WE ARE IONTO-COMED

When it comes to cosmetic equipment, we are at the forefront of new technical developments and set the bar high for innovation within the industry. We see it as our mission to draw on our experience and convert the new possibilities offered to us by technology into practical devices. We take our inspiration from all over the world and then develop and manufacture our devices in Germany.

Through our successful in-house development process and drawing on our technological and cosmetic expertise spanning almost all disciplines, we produce top-class cosmetic devices and provide extremely effective treatments, and it doesn't end there: our devices have been designed to complement each other and offer the greatest possible safety. They're also very user-friendly and can be used and adapted in a way that suits our customers. This is something we've been doing for 4 decades. For you.

A family business from Germany.

The company is a certified manufacturer of medical devices.

**Serenity,
self-confidence
and strength.**

OUR VISION

IONTO-COMED is all about well-being and taking care of your own natural beauty and aesthetics. If you feel good in yourself, understand your needs and set some time aside to rest and care for yourself, you'll be able to overcome the challenges thrown at you, staying calm and composed. And give your health a helping hand too.

We offer our customers a pleasant, enjoyable way of facing the challenges of a modern society. In doing so, IONTO-COMED makes an important contribution to generating a healthy, balanced and stable society by providing professional treatment concepts, furnishings and equipment for experts.

IONTO-COMED OUR ASPIRATIONS

OUR PRODUCTION

IONTO-COMED takes a holistic approach to health, the environment and society. We support young talent through training, further education and competitions and by taking our corporate social responsibility seriously.

IONTO-COMED devices and treatment chairs are designed, developed and produced in-house, perfectly tailored to the specific needs of our customers and meeting industry standards and norms as a matter of course.

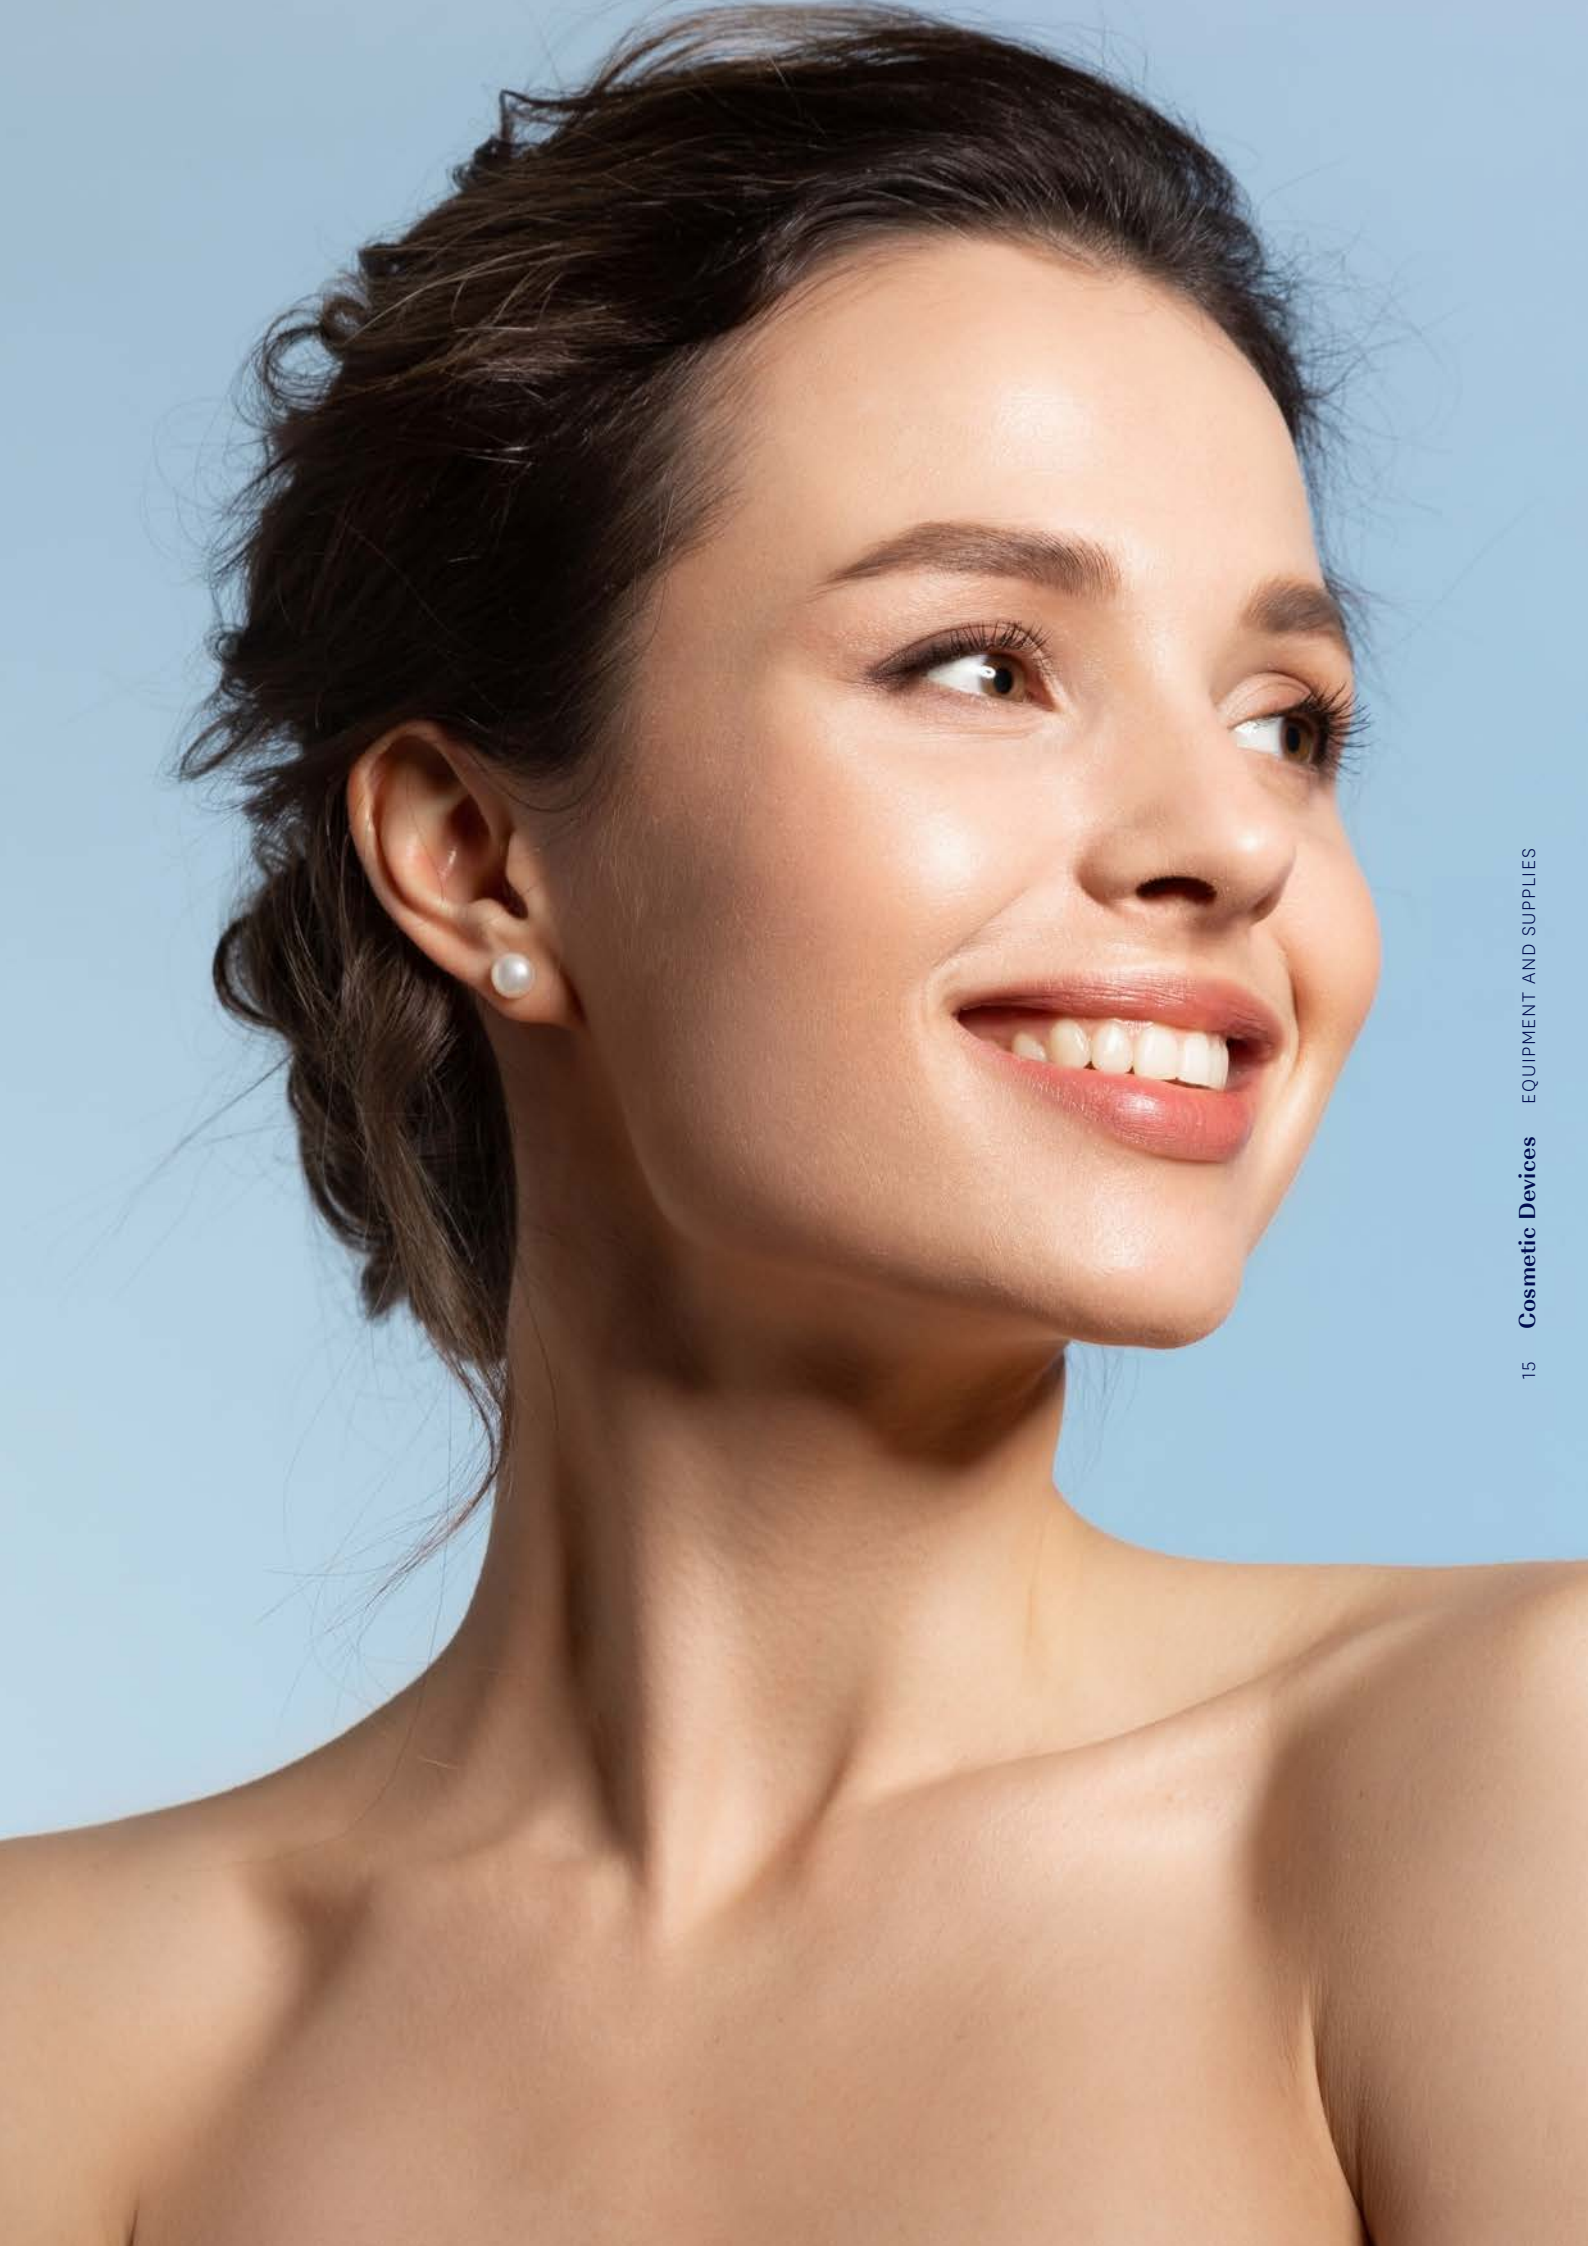

IONTO-COMED operates a clean, energy-efficient production process and we ship our products using a particularly climate-friendly method, taking our corporate responsibility into account.

COSMETIC EQUIPMENT AND SUPPLIES

Cosmetic Equipment

Innovative solutions for cosmetic equipment

Back in the 1970s, company founder Getraud La Fontaine revolutionized cosmetics with the first iontophoresis devices. Since then, we have been working continuously on technical solutions for beautifying skin and enhancing natural beauty. As one of the leading providers of cosmetic equipment, we develop devices which can be used as part of various treatment methods.

TOP BIN

DEVICE FEATURES

- Herbal and aromatic steaming
- Fully electronically controlled
- Regulation of steam quantity depending on skin type
- Timer for steaming can be set between 5-30 min.
- Ergonomic round handle
- Easy-to-use membrane keyboard
- Use of tap water possible
- Stable stand with space for up to 3 BASIC LINE cosmetic devices
- 4 lockable castors
- Option to mount any of the IONTO-COMED magnifying lamps
- Featuring a retaining ring for easy movement of the tower, in grey or white
- Integrated holder for storage tray/ water bowl

WHAT'S INCLUDED?

- IONTO-HERB TOWER with IONTO-HERB steamer, herb strainer, tower stand,
- Option to mount IONTO-COMED magnifying lamps
- Waste bin with swing top and holder for water bowl/storage tray

TECHNICAL SPECIFICATIONS

- Electrical connection: 30 V/50-60 Hz
- Dimensions H/W/D: 100 cm/40 cm/43 cm
- Weight: approx. 26 kg

ITEM NO.:	ATTACHMENT VARIANTS
8119.02	Accessory tray with handpiece holder
8119.002	Storage tray
8119.003	Storage tray holder
8316.001	Water bowl holder
8826.3	Mains adapter + cable splitter for modular devices
8316.002	Water bowl, 2.5 litre capacity, Ø 24 cm, colour may be different to picture
8888.008	Replacement swing top bin
8416.1	Replacement herb strainer

BASIC LINE

IONTO-PEEL

The entry-level device for professional cleansing and peeling

FACIAL CLEANSING BRUSH

The rotating brush removes make-up faster and more thoroughly than is possible by hand and does everything customers want: gentle massage and deep pore cleansing to result in soft skin.

FACIAL PEELING BRUSHES

The certified beauty filament bristles in IONTO-COMED exfoliating brushes remove excess skin cells and hardened skin quickly and thoroughly, without exposing the skin to acid. Blood flow is stimulated naturally and the skin is perfectly prepared to absorb the care products applied after treatment.

DEVICE FEATURES

- Ultra-quiet lightweight handpiece, tried-and-tested technology, constant speed — even when pressure is applied to the brush, variable adjustment with the touch display, wide array of attachments available separately
- Please order your attachments, such as brushes and pumice stones, separately.

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 V/50-60 Hz
- Dimensions W/H/D: 19 cm/6.6 cm/17.3 cm
- Weight: approx. 1 kg
- Speed: 20 to 600 rpm

IMPROVED IONTO-COMED BRUSHES

Our goal is for you to always work with top-class materials and the latest technology. This is why we have changed our animal hair brushes to our new extremely high-quality brushes with certified beauty filament bristles.

Benefits: MADE IN GERMANY, certified beauty filament bristles, skin-friendly and safe, for long-term professional use, long-lasting, odourless, can be disinfected, including in an ultrasonic bath.

ITEM NO.: CARE PRODUCTS TO BE ORDERED SEPARATELY

9211.20	CLEAN cleansing foam, 150 ml
9211.16	CLEAN neutralising toner, 500 ml
9211.29	COMBINE peeling powder, 75 g
8228.080	Bio cellulose cherry blossom mask, pack of 10
9223.90	Super Clean 2 ml vials, pack of 10

SilkySky — FACIAL CLEANSING BRUSH (Ø 20 mm)

Gentle, deep pore facial cleansing. Especially suitable for eye, nose and lip areas.

SilkySky — FACIAL CLEANSING BRUSH (Ø 45 mm)

Gentle, deep pore facial cleansing. If you've worked with the goat's hair brush before, the SilkySky is the perfect new brush for you.

BlueBay — FACIAL PEELING BRUSH

Removes excess hardened skin, unclogs blocked pores, stimulates blood flow and revitalises the skin.

LovelyLavender — BODY CLEANSING BRUSH

Cleans the body's skin quickly and thoroughly and stimulates blood flow.

LavenderMelange — BODY PEELING BRUSH

Removes excess hardened skin on the body, provides a powerful massage and ensures that skin is ready to properly absorb the care products applied after treatment. If you've worked with the horsehair brush before, the LavenderMelange is the perfect new brush for you.

Pumice stone (Ø 20 mm)

For use on small areas of skin.

ITEM NO.: ATTACHMENTS TO BE ORDERED SEPARATELY

8260	Pumice stone, Ø 45 mm, for face and body
8361	Sponge holder, can be re-used multiple times
8361.001	Replaceable sponges, 1 pack of 10 for use with IONTO-PEEL sponge holder

BASIC LINE

IONTO-VAC Spray

The classic vacuum device for tissue-friendly pore extraction and suction cup massage to improve blood flow to the skin

TISSUE-FRIENDLY PORE EXTRACTION, PULSATING VACUUM, SPRAY AND SUCTION CUP MASSAGE

Surface impurities are removed and deep impurities are loosened so that they are easier to clean out. Blood and lymphatic flow are also stimulated through the suction devices applied to the skin.

The spray bottle is used to apply lotions or tonics as

fine mists after treatment. In addition to professional pore extraction, the relevant attachments can also be used for suction cup massage, which increases cell metabolism, makes it easier for the skin to absorb care products and can also relieve tension.

ITEM NO.:	CARE PRODUCTS TO BE ORDERED SEPARATELY
9211.20	CLEAN cleansing foam, 150 ml
9211.16	CLEAN neutralising toner, 500 ml
9223.91	Anti-ageing 2 ml vials, pack of 10
9223.92	Hydro 2 ml vials, pack of 10
9121.6	Almond oil, 100 ml
9121.7	Anti-cellulite oil, 100 ml

- 8256 large
- 8356 small
- 8456 oval, for pore extraction & wrinkle treatment

ADAPTER

- 8362 For glass vacuum attachments and suction cups.

*Innovative
cold plasma technology*

BASIC LINE

IONTO-PLASMA Light

Cold plasma technology — a glass electrode is filled with noble gas to form ozone, which is particularly good at sanitising red, irritated skin and its impurities

SKIN DISINFECTION — SANITISE, ACTIVATE AND REVITALISE

Treatment with IONTO-PLASMA Light (cold plasma technology) stimulates blood flow to the skin, shrinks tissue and also disinfects. The IONTO-PLASMA Light rod can be placed on the affected area immediately after impurities have been removed. The ozone produced very gently disinfects and prevents inflammation. The roller electrode can be used over large areas, e.g. on the back or cleavage area.

The treatment is also suitable for disinfection after hair removal, as well as for use in medical foot care, e.g. to effectively treat warts (open electrode), for granulated, inflamed skin tissue in the nail bed (roller electrode), to prevent fungal diseases (circular electrode) and for inflamed corns.

ITEM NO.:	CARE PRODUCTS TO BE ORDERED SEPARATELY
9211.20	CLEAN cleansing foam, 150 ml
9211.16	CLEAN neutralising toner, 500 ml
8228.080	Bio cellulose green tea mask, pack of 10
9223.94	IONTO-COMED PROFESSIONAL CARE PURE 2 ML VIALS, pack of 10

DEVICE FEATURES

- Quiet operation
- Simple, secure electrode plug-in mechanism
- Different electrodes for various uses

WHAT'S INCLUDED?

- IONTO-PLASMA Light device and rod
- Please order your electrodes separately.

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 V/50-60 Hz

For stimulating blood flow and helping to reactivate hair growth

8273.003 IONTO-PLASMA Light electrode, closed, for the scalp

IONTO-PLASMA LIGHT ELECTRODE, OPEN

For use in pedicures

8273.004 IONTO-PLASMA Light electrode, open

BASIC LINE

IONTO ICE & HEAT

Cooling and stimulating

Promotes natural vascular training for muscles and tissue by opening and contracting follicles and also soothes, ideal after eyebrow and upper lip waxing.

COOLING AND STIMULATING — VASCULAR TRAINING

The heating mode of the IONTO ICE & HEAT can significantly increase the effect of the preparations used. The blood flow is stimulated and the metabolism is activated. When in cooling mode, however, vessels react naturally by momentarily constricting and blood flow subsequently becomes more intense. In addition, the cold has a soothing effect after eye-brows have been plucked, following pore extraction or for puffy bags under the eyes.

The alternating warm-cold treatment (vascular training) with the IONTO ICE & HEAT rod is unique, as the one rod can be operated in two modes. This stimulates the metabolism and improves the absorption of the agents used. Tissue and muscles are strengthened too.

ITEM NO.:	CARE PRODUCTS TO BE ORDERED SEPARATELY
9223.91	Anti-ageing 2 ml vials, pack of 10, for use during heat treatment
9223.92	Hydro 2 ml vials, pack of 10, for use during cold treatment
8228.083	Bio cellulose deep sea mask, pack of 10

- Dimensions W/H/D: 19 cm/6.6 cm/17.3 cm
- Weight: approx. 1 kg

UNIVERSAL HANDPIECE REST

BASIC LINE

IONTO-SKIN Regulator

Detox and lymphatic massage through vibration - decongesting, purifying, stimulating

MICRO-MASSAGE:

Gentle vibrations in the depths of the tissue with various frequencies (5-50 MHz), activation of the skin and its metabolic function to help the body's own detoxification process

DETOX AND LYMPHATIC MASSAGE

With the IONTO-SKIN regulator, IONTO-COMED has developed a unique technique called micro-massage. This unusual treatment is setting new trends in the field of cosmetics: a manual treatment method carried out with the support of cosmetic equipment. Your hands glide over customers' faces and bodies and make their skin and muscles vibrate very gently.

The IONTO-SKIN regulator works between 5-50 Hz, meaning that it can reach down into the depth of the tissue. By activating the lymphatic flow, metabolic waste products are removed. A balance is created between detoxifying and caring for the skin so that it comes out looking healthy and radiant. The treatment ensures an optimal supply of oxygen and nutrients to the tissue. In addition, muscles are toned and relaxed. You can also use the effect of the vibration specifically to relax your customers!

WHAT'S INCLUDED?

- IONTO-SKIN regulator (Item no.: 8826.8228)
- Vinyl gloves size S (Item no.: 8228.050)
- Reusable adhesive electrodes, pack of 4 (Item no.: 8228.009)
- Powder, 100 g (Item no.: 8228.005)
- Towelling bands, one pair (Item no.: 8228.011)
- Coiled cable, white, with push button (Item no.: 8228.100)
- Commercial electrode (Item no.: 50312)
- Coiled cable, white (Item no.: 50314.2)
- BIOMATRIX caviar mask, pack of 5 (Item no.: 8228.021)
- Membrane sensor 30 cm x 30 m (Item no.: 8228.031)
- Water pipette for application (Item no.: 8228.0220)

G LOWSOLUTION

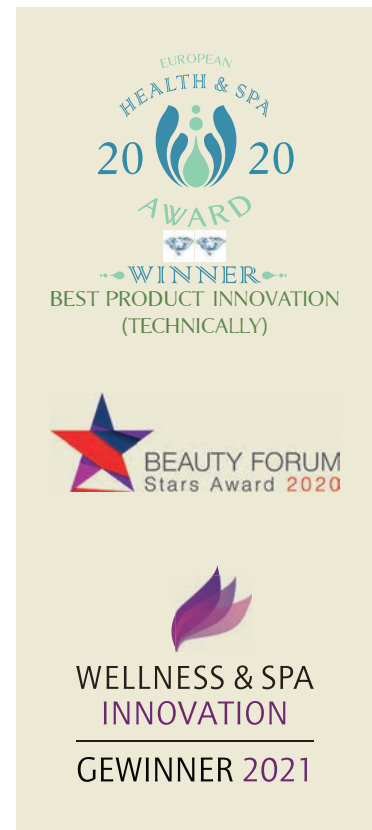

Hydroderm treatment: four steps for instantly plumper, smoother, deeply nourished skin and the perfect glow

EXPERIENCE THE NEW GENERATION THE HYDRODERM TREATMENT

GlowSolution is a groundbreaking treatment method for creating instantly plumper, glowing skin — and it's free from unwanted side effects and waiting time. In 4 revolutionary steps, GlowSolution combines the power of high-end technology MADE IN GERMANY with the effect of functional solutions to give customers that spa-treatment feeling.

IONTO-COMED uses the principle of hydroderm treatment and has developed technology that reaches all three layers of the skin as well as the underlying SMAS (facial fascia). With specialised handpieces for fully-automated, electronically-controlled operation and unique active ingredients (solutions) for the four treatment steps, GlowSolution is a true all-rounder for creating the perfect glow.

4 POWERFUL STEPS FOR RESULTS THAT ARE IMMEDIATELY VISIBLE AND LONG-LASTING:

1. **GlowPurify** *Deep cleansing*

Make-up is gently and thoroughly removed with cleansing solution.

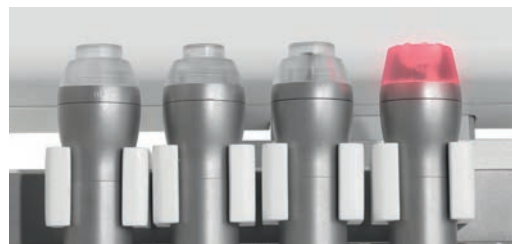

2 **GlowPolish** *Refining & purifying*

Never-before-seen intensive polishing with peeling solution

3. **GlowPermeation** *Intensive permeation of active ingredients*

Revolutionary stream ultrasound technology ensures that the active ingredient solutions are properly dosed and worked into the skin with continuous skin contact.

4. **GlowPush-up** *Dynamic pulse massage*

An innovative tissue and SMAS massage in three steps, combined with permanent infusion of active ingredient solutions.

UNIQUE. INTELLIGENT. MADE IN GERMANY.

HANDPIECES WITH INTEGRATED LIGHT APPLICATION

Different handpieces and special attachments are used for each treatment step. All handpieces have a vacuum system that draws the skin to the special attachment in a controlled manner. They are then used to apply the relevant solutions to the specific areas of skin, with these solutions having been adapted to the technology used.

ACTIVE INGREDIENTS (SOLUTIONS)

We took great care in selecting the ingredients for our exclusive solutions and they are perfectly tailored for the individual treatment steps they are used in. All solutions are free from parabens, PEGs, palm oil, dyes, fragrances, silicones and mineral oils.

INTEGRATED LIGHT APPLICATION IN ALL TREATMENT STEPS

MAIN INGREDIENTS

GlowPurify

1. Capryl — power medium
2. Glucosides — mild sugar surfactant, hygroscopic

GlowPolish

1. Glycolic acid — dissolves cellular compounds, provides gentle, effective exfoliation
2. Panthenol — vitamin B5, for skin elasticity

GlowPermeation

1. Barley extract — rich in vitamins, minerals, proteins and enzymes, makes skin supple and toned
2. Hyaluronic acid — highly hygroscopic

GlowPush-up

1. Hyaluronic acid and algin derived from brown algae — bind moisture
2. ATP* primary energy source — supplier of cells
3. Magnesium, zinc, copper — anti-inflammatory

*Adenosine triphosphate: the skin's own substance in the cells

SPARING

GlowSolution uses optimal solution doses. The amount of active ingredient that reaches the skin can be precisely adjusted at any time so the skin doesn't get anything it doesn't need. Only as much as is really necessary for treatment to succeed is used.

INNOVATIVE

The new Flow Booster gives a boost of solution at the push of a button, even at the gentlest treatment setting. A new software programme has been developed specifically for GlowSolution that cleans, disinfects and rinses all of the device's hose systems as part of a disinfection programme.

HIGH-QUALITY

The exclusive solutions used for GlowSolution were developed in collaboration with a skilled development team made up of beauticians, chemists and engineers, and has been specifically tailored to the device and treatment. GlowSolution is manufactured in line with the highest quality standards: stainless steel handpieces, sturdy metal housing, a touchscreen, caps made of anti-allergenic carbonate, valves and much more. All in all, the innovative procedure provides a relaxing experience and is ideal for anyone who would like to provide special cosmetic treatment.

→ *Unique technology, including patent pending innovation*

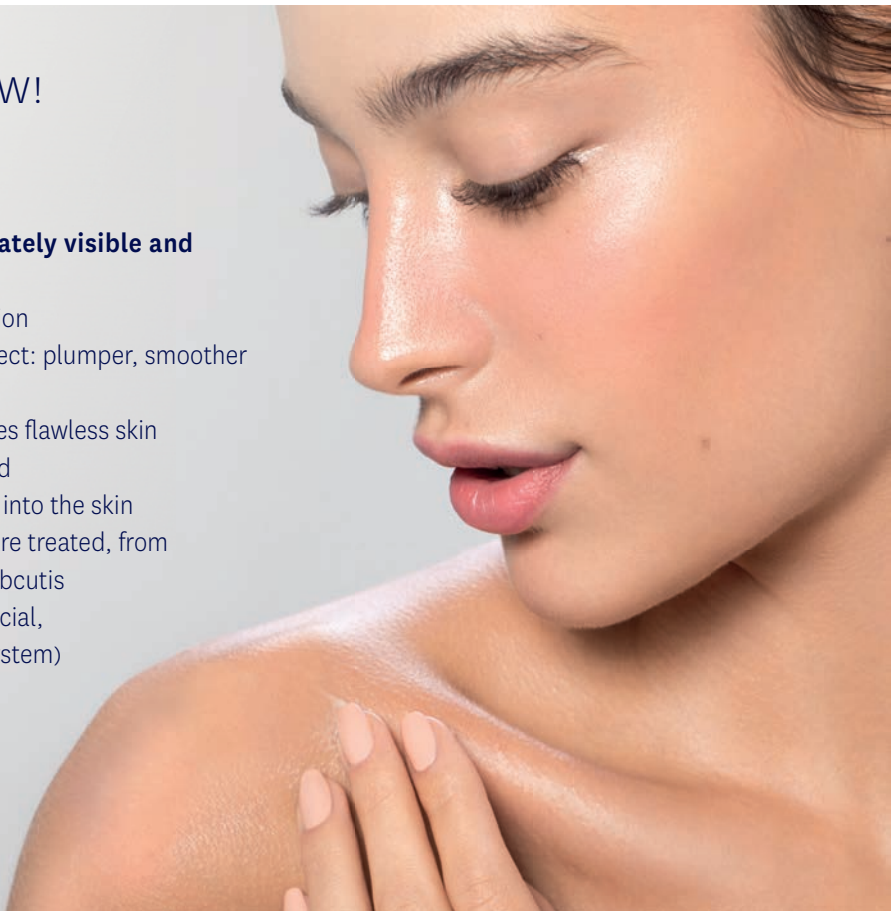

→ *Made in Germany, in cooperation with the Fraunhofer Institute*

→ *Intelligent, hygienic self-cleaning process, easy to use, high-quality materials used to make the device*

GET YOUR GLOW!

Effects that are immediately visible and long-lasting:

- ✓ Fresh, radiant complexion
- ✓ Immediate push-up effect: plumper, smoother skin
- ✓ Soft-focus effect: creates flawless skin
- ✓ Pigmentation is reduced
- ✓ Solutions applied deep into the skin
- ✓ All 3 layers of the skin are treated, from the epidermis to the subcutis
- ✓ SMAS massage (superficial, musculoaponeurotic system)

ITEM NO.: 8442

GLOWSOLUTION

EXCLUSIVE LINE

GlowSolution Reverse Needling

Discover the world-first technique free from non-ionising radiation

Reverse Needling: revolutionary Glow Needling with new DIP (Dynamic Intake Perforation) technology and automated influx of active ingredients through the handpiece! The patent is pending for this world first, which ensures smoother skin and a “de-puff” effect in just a few minutes and is combined with GlowSolution steps 1, 2 and 4.

WORLD FIRST

TECHNICAL SPECIFICATIONS

- Voltage: 24 V
- Dimensions (W/D/H) in mm: 490 x 475 x 1280
- Weight: 42.4 kg
- Power cable: 1.8 m

WHAT'S INCLUDED?

- GlowSolution device
- 4 handpieces
(including reverse needling handpiece)
- Basic cap for GlowPurify & GlowPolish
(Item no.: 8442.109)
- Basic cap for Reverse Needling (Item no.: 8442.110)
- Basic cap for GlowPush-up (Item no.: 8442.111)
- Advanced cap for GlowPurify & GlowPolish
(Item no.: 8442.112)
- Needling pads, 10 pieces (item 8443.01)

4 STEPS, MAXIMUM 60 MINUTES:

1. GlowPurify

Deep cleansing: gentle, thorough cleaning with cleansing solution.

2. GlowPolish

Refining & purifying: never-before-seen intensive polishing with peeling solution.

3. Reverse needling

A world first:
brand new Glow Needling with DIP technology (dynamic intact perforation) and a constant automatic influx of active ingredients from the needling handpiece.

4. GlowPush-up

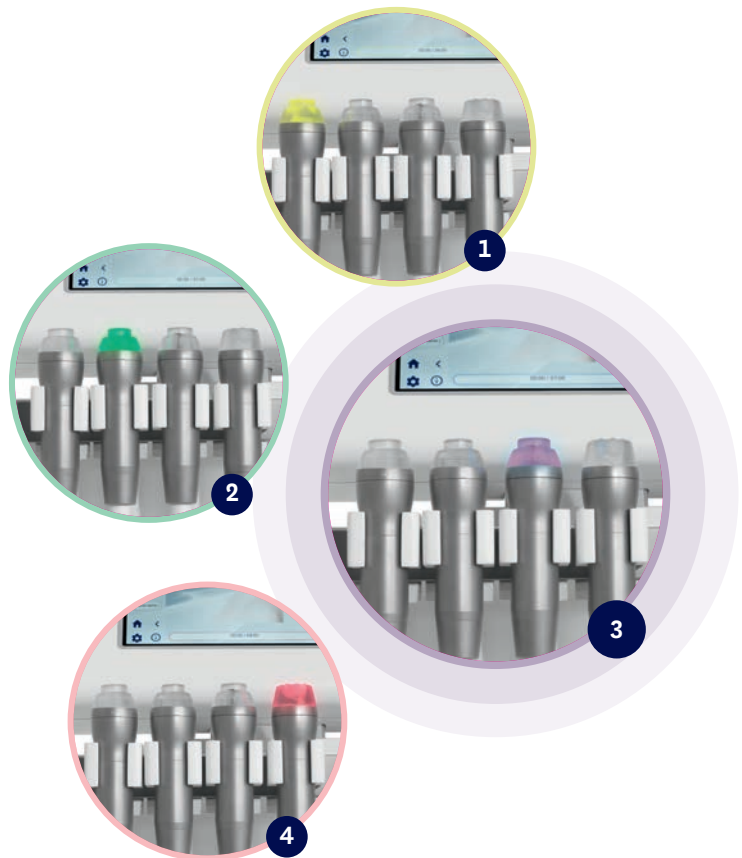

Dynamic pulse massage: innovative, liquid-based tissue and SMAS* massage in two steps

REVERSE NEEDLING: REVOLUTIONARY GLOW NEEDLING

Brand new Glow Needling with DIP technology (Dynamic Intake Perforation), the first of its kind in the world

Reverse Needling is revolutionising micro-needling by by-passing what is known as the “umbrella effect” and supplying a constant influx of active ingredients via a hose system. The patent is pending for this world first, which results in smoother skin and a “de-puff” effect in just a few minutes, no waiting time required!

The DIP technology (Dynamic Intake Perforation) prevents the skin from giving way and automatically creates the optimal perforation angle. The solution is automatically guided into the handpiece via a hose system and is continuously worked in.

IMMEDIATELY AFTER TREATMENT:

- + Exceptionally smooth skin
- + “De-puff” effect
- + Fine wrinkles and lines are smoothed out

*superficial musculoaponeurotic system
(“facial fascia”)

MICRO-NEEDLING

THE CHALLENGE

Many problem skin conditions require more than just a skincare routine. Cell processes are slowed down and the top layer of skin acts as a barrier that many of the agents applied cannot overcome. The solution: cosmetic micro-needling.

MICRO-NEEDLING — A FINE TOUCH TO PROVIDE A HELPING HAND

Ultra-fine tips punch tiny openings into the epidermis whilst retaining the natural protective function of the skin. The tips move up and down in a fully automatic process, similar to a stamp, perforating the epidermis precisely and evenly. This is completely painless, gentle and fast. Concentrated active ingredients, even those with a high molecular weight, penetrate the skin directly and evenly. In this way, they can make an impact where it counts: in the deeper structures of the skin.

FOR RADIANT SKIN

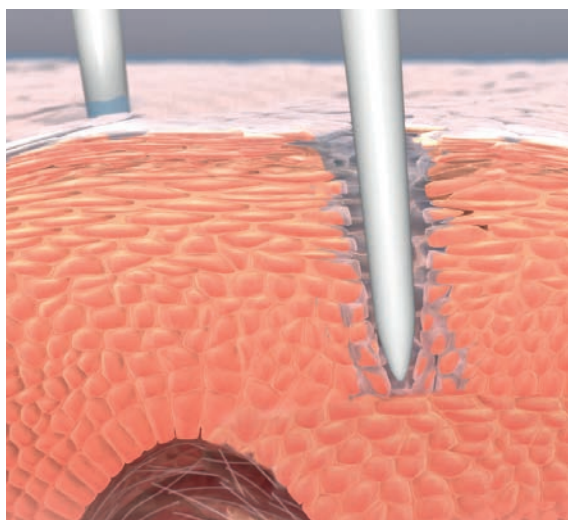

Fresh, smooth and optimally nourished skin makes every face look younger. Cosmetic micro-needling gives skin all the vital substances and anti-ageing aids it needs. It absorbs the active ingredients directly and the effects are immediately clear to see. At the same time, the skin regenerates itself from within through the penetration of the epidermis.

PADS: THE BENEFITS

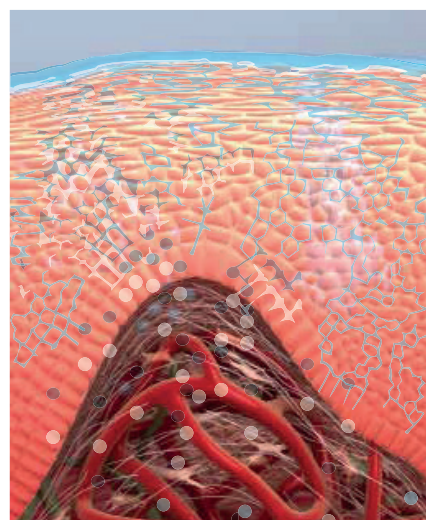

- Pain-free, pleasant treatment with 18 tiny needles
- Pads are single-use and come individually packaged so treatment is safe and hygienic
- The depth the needles penetrate into the skin can be adjusted on the handpiece to suit the individual customer, so the treatment can be administered at the intensity required
- Each pad features a side opening which can be filled with active ingredient concentrate. This is then directly worked into the skin during treatment
- Operation is comfortable, very precise and consistent thanks to the powerful motor in the handpiece: this is used to move the pad quickly up and down, similar to a stamp, so that it can be passed over the skin without pressure being applied

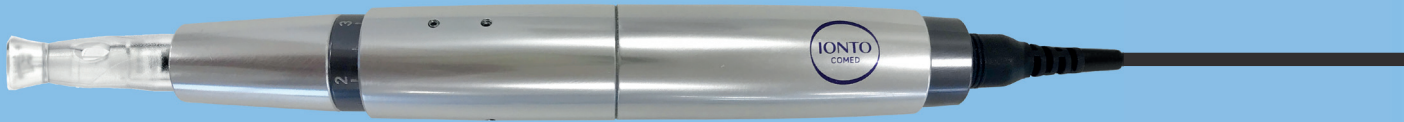

Efficacy
scientifically proven

Ultra-fine NEEDLING tips work gently and precisely to punch tiny openings into the epidermis.

Active ingredients (shown in blue) penetrate the skin deeply and evenly

EXCLUSIVE LINE

IONTO-NEEDLING

Needling (MESO SL) as a gentle alternative to injections and filler treatments

MICRO-NEEDLING

Ultra-fine tips punch tiny openings into the epidermis whilst retaining the natural protective function of the skin. The tips move up and down in a fully automatic process, similar to a stamp, perforating the epidermis precisely and evenly. This is completely painless, gentle and fast. Concentrated active ingredients, even those with a high molecular weight, penetrate the skin directly and evenly. Not only is this the best way for active ingredients to be absorbed into the skin, but it also means that the skin can regenerate itself from within.

Individual: the depth of penetration and pricking frequency of the NEEDLING treatment can be quickly adapted to best suit your customers' skin.

Hygienic: every customer gets fresh NEEDLING tips - the attachments are easy to change

Intuitive: integrated touchscreen

WHAT'S INCLUDED?

- IONTO-NEEDLING device with NEEDLING handpiece comfort
- IONTO-NEEDLING pad (synthetic needles, pack of 10, item no.: 8433.1011)
- Promotional material for professional use as desired
Please indicate what you'd like when you place your order

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 V ~/50-60 Hz
- Dimensions W/H/D: 19 cm/6.6 cm/17.3 cm
- Weight: approx. 1 kg

IONTO-NEEDLING PADS

Pain-free, pleasant treatment with 18 tiny needles on IONTO-NEEDLING pads

PLEASE NOTE:

It is only possible to order after professional micro-needling training has been completed.

OUR TOP TREATMENT TIP

We recommend the HYDRATE active ingredient concentrate for treatment with the micro-needling pen. Thanks to the molecular properties of the hyaluronic acids it contains, the liquid concentrate can penetrate deep into the skin, as well as actively bind moisture in the upper layers too. The concentrate is friendly to skin and slightly viscous in consistency, making it perfect for cosmetic micro-needling. Free from fragrances, parabens, silicones, colorants, PEGs and paraffins.

ITEM NO.: ATTACHMENTS TO BE ORDERED SEPARATELY

8433.201	NEEDLING (MESO) Scalable handpiece comfort
1800.A008	NEEDLING (MESO) customer information sheets, pack of 25

* Steel needles can only be ordered by medical beauticians, natural health professionals and doctors who have completed professional micro-needling training.

MICRODERMABRASION

FOR SILKY-SMOOTH SKIN

The ultra-pure fine crystals obtained from special clay effectively remove parts of the stratum corneum (the top layer of the epidermis, contains dead skin cells) in a controlled manner. The result: thorough skin resurfacing — for a refined, even complexion purified deep into the pores.

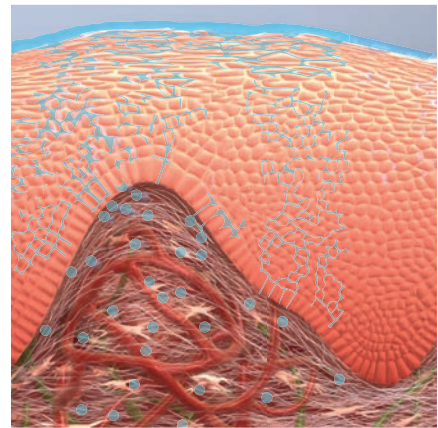

Microdermabrasion

PRECISE TREATMENT FOR:

- Face
- Neck
- Cleavage area
- Back of the hands
- Parts of the body

Active ingredients (shown in blue) penetrate the skin deeply and evenly

MICRODERMABRASION CRYSTALS: THE BENEFITS

Crystal clear: the crystal sand obtained from special clay is high in purity and ensures safe, effective and skin-friendly treatment.

Hygienic: ultra-gentle professional attachments can be sterilised and reused.

Intelligent: the digital menu checks the flow of crystals, and the device cleans itself at the push of a button.

Perfectly prepared: pre-set programmes for the face and body make providing treatment a breeze.

Easy: the menu is easy to use and the treatment parameters can be changed at the touch of a button at any time.

A big difference to diamond dermabrasion: a clean, precise and controlled peeling process - thanks to the use of fresh micro-crystals, the procedure is gentle on the skin and ensures effective skin resurfacing.

HIGH-QUALITY CRYSTALS

MADE IN GERMANY, high-purity and anti-allergenic crystals produced under the strictest conditions — safety ensured for you and your customers. The crystals are available in two grain sizes — MACRO and MICRO crystal sand.

TREATMENT RESULTS

- Better skin structure
- More even complexion
- Soft-focus effect
- Refined pores
- Reduced wrinkles
- Alleviation of pigmentation disorders
- Relief of scars and stretch marks
- Stimulation of new cell formation
- Easier, gentler pore extraction
- Improved absorption of active ingredients

Efficacy
scientifically proven

EXCLUSIVE LINE

IONTO-SKIN ABRASION

Comfort

Microdermabrasion — gentle skin resurfacing with hypoallergenic crystals

Deep pore abrasion as opposed to superficial diamond peeling.

FOR SILKY-SMOOTH SKIN

- The controlled removal process makes skin more even and minimises pores.
- Regular skin removal promotes regenerative skin processes.
- Blood flow is stimulated, skin is given new energy, and deep tissue is strengthened.
- The skin's surface appears visibly smoother and can better absorb active ingredients.

THE OUTLOOK IS MAGICAL

By specifically removing layers of dead cells, your customer's skin will look fresher, rosier, younger and more radiant immediately after their IONTO-SKIN ABRASION treatment. Active ingredients can now be properly absorbed, and in high quantities. And it's deep below the surface of your skin where the magic really happens: skin regenerates itself and enhances itself from within!

ITEM NO.:	ATTACHMENTS TO BE ORDERED SEPARATELY
8339.003	Glass tip, standard
8339.013	Safety goggles, one size fits all
8239.20	MICRO crystal sand, 1 x 3 kg can
8239.2	MICRO crystal sand, 1 x 1 kg can
8339.001	Air filter for old crystal containers, pack of 4, to be replaced approximately every 6 weeks
8239.15	Eye protection pads, 50 pairs

9223.93	Sensitive 2 ml vials, pack of 10

WHAT'S INCLUDED?

- IONTO-SKIN ABRASION Comfort
- IONTO-SKIN ABRASION premium handpiece
- 2 glass tips, standard
- 1 kg MICRO crystal sand
- Safety goggles

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 V/50-60 Hz
- Dimensions H/W/D: 23.5 cm/34.5 cm/30.5 cm
- Weight: approx. 10 kg

OUR TOP TREATMENT TIP

We recommend HYDRATE cream for after microdermabrasion. The fast-absorbing moisturiser regulates any tightness over the long term and restores the skin's natural protective barrier - gentle skincare without fragrances, paraffins, parabens, silicones, dyes or PEGs.

EXCLUSIVE LINE

IONTO-SKIN ABRASION Sono

The combination of microdermabrasion and ultrasound — for skin and cell regeneration and penetration of active ingredients through phonophoresis

MICRODERMABRASION

With IONTO-COMED's microdermabrasion method, ultra-pure fine crystals effectively remove parts of the stratum corneum (the top layer of the epidermis, contains dead skin cells) in a controlled manner. Your customer's skin instantly looks fresher, rosier, younger and more radiant. Active ingredients can now be properly absorbed, and in high quantities. And it's deep below the surface of your skin where the magic really happens: skin regenerates itself and enhances itself from within.

ULTRASOUND

Deep-acting firming and micro-massage:

The 1 MHz and 3 MHz ultrasound treatment from IONTO-COMED is a 3-in-1: heat treatment, micro-massage and infiltrating phonophoresis. Connective tissue is tightened, microcirculation is increased and skin cells are far more able to absorb active ingredients. For visibly effective treatment and smooth skin.

ITEM NO.:	ATTACHMENTS TO BE ORDERED SEPARATELY
8421.101	Ultrasound handpiece with skin contact detection for body treatments, 5.0 cm ²

8228.080	Bio cellulose cherry blossom mask, pack of 10

WHAT'S INCLUDED?

- IONTO-SKIN ABRASION Sono
- IONTO-SKIN ABRASION premium handpiece
- Ultrasound handpiece for face, 2.5 cm²
- 2 glass tips, standard
- 1 kg MICRO crystal sand
- SONO contact gel, basic, 250 ml
- Ultrasound customer information sheets (Item no. 1800.A011)
- Abrasion customer information sheets, pack of 25 (Item no. 1800.A009)
- Safety goggles

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 V/50-60 Hz
- Dimensions W/D/H: 34.5 cm/40.0 cm/23.5 cm
- Weight: approx. 14 kg

The combination of two types of technology can be used for a wide variety of skin types and is ideal for integrating into an array of cosmetic treatments. Depending on the customer's skin type, microdermabrasion and ultrasound can also be used on their own.

BENEFITS

Crystal clear: MADE IN GERMANY, high-purity and anti-allergenic crystals produced under the strictest conditions — safety ensured for you and your customers.

Hygienic: *ultra-gentle professional microdermabrasion attachments can be sterilised and reused.*

Intelligent: the digital menu checks the flow of crystals, and the device cleans itself at the push of a button.

Perfectly prepared: pre-set programmes for the face and body make providing microdermabrasion and ultrasound treatment a breeze.

Individual: you can select and save your favourite settings at any time.

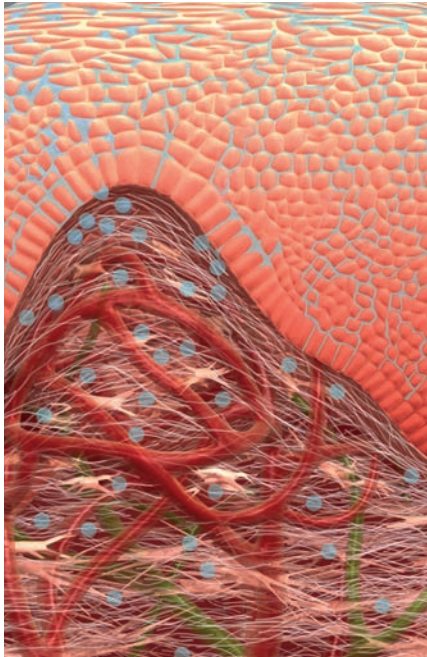

Easy: the menu is easy to use and the treatment parameters can be changed at the touch of a button at any time.

ULTRASOUND

TOP-CLASS COSMETIC RESULTS

Ultrasound can have a wide range of cosmetic effects: depending on its frequency, intensity, and whether it is continuous or pulsed, it can be used for micro-massage, to gently exfoliate the skin, influence the diffusion of substances through cell membranes, heat certain areas of the skin or boost cell processes. And it's not just the ultrasound itself that plays a role in this kind of treatment, the active substances injected have an effect on skin too.

Active ingredients (show in blue) are injected deep into the skin

IMMEDIATE IMPACT

Ideal for spas and hotels! Treatment can be administered in connection with water & sauna use without a problem.

AREAS OF APPLICATION

- Deep peeling
- Wrinkles
- Slack skin
- Dry skin
- Dull skin with poor circulation
- Skin impurities
- Acne

EXCLUSIVE LINE

IONTO-AQUASONIC

Extra-deep cleansing, revitalisation and filling with low-frequency ultrasound

The shape of the handpiece, in conjunction with the electronic control system, mean this treatment has two different modes of action: surface cavitation for cleansing and phonophoresis for deep infiltration

RESULTS

- Deep cleansing and peeling
- Reduction of impurities & scabs
- Regeneration of atrophic skin
- Dull skin is refreshed
- Smokers' skin is revitalised
- UV-damaged skin is repaired
- For every skin type
- Can be used all year round
- Pore extraction is made easier
- Skin is refined

AQUA PEELING — DEEP PEELING

With its specific low-frequency ultrasound vibrations, aqua peeling treatment gently and thoroughly removes dead cells, hardened skin, blackheads, scabs and any residue of make-up or care products containing silicone in a way like no other. In contrast to fruit acids or abrasion, aqua peeling treatment is extremely gentle and can be used on sensitive, thin skin, with no scraping or aggressive acids in sight.

The result: radiantly beautiful, fresh and silky smooth skin, whatever the customer's skin type!

SONICREPAIR/REVITAL

DEEP INFILTRATION AND REVITALISATION

The Sonicrepair and Sonicrevital treatments are carried out with the bio cellulose masks and involve active substances being injected into deeper layers of the skin.

Result: optimal absorption of active substances by skin cells. The treatments biostimulate tissue, and the supply of nutrients to the skin and the skin's metabolism are given a boost.

ITEM NO.:	ATTACHMENTS TO BE ORDERED SEPARATELY
8826.201	AQUASONIC handpiece holder
1800.B032	Aquasonic treatment concept, 1 piece
8239.15	Eye protection pads, 50 pairs
ITEM NO.:	CARE PRODUCTS TO BE ORDERED SEPARATELY
9211.20	CLEAN cleansing foam, 150 ml
9211.16	CLEAN neutralising toner, 500 ml
9211.24	COMBINE 5% fruit acid peel, 50 ml
9211.25	COMBINE 10% fruit acid peel, 50 ml
9211.29	COMBINE peeling powder, 75 g
9211.41	HYDRATE active ingredient concentrate, 50 ml
9211.32	HYDRATE eye gel, 50 ml
9211.37	HYDRATE cream, 200 ml
8228.061	Bio cellulose green tea mask, 30 ml
8228.095	Beetox age reverse bio cellulose mask, pack of 10
9223.97	Ocean 2 ml vials, pack of 10

BENEFITS

Individual: intensity can be fine-tuned to suit the customer and time setting can also be varied

Perfectly prepared: 3 built-in programmes for different skin needs depending on the customer

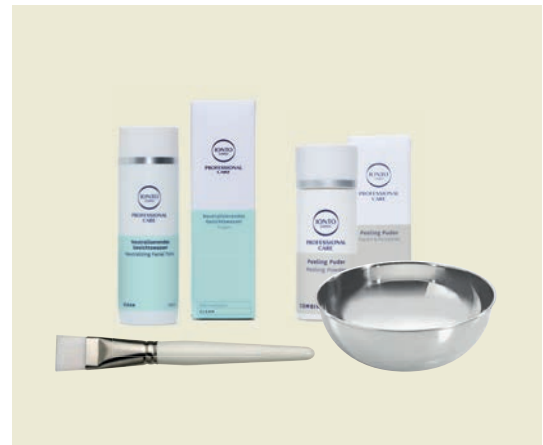

Intelligent: easy menu navigation via an integrated touchscreen

WHAT'S INCLUDED?

- IONTO-AQUASONIC device
- AQUASONIC handpiece a1 + a2
- 1 pair of disposable eye protection pads
- AQUASONIC handpiece holder (Item no.: 8826.201)
- Neutralising toner, 500 ml
- Peeling powder, 75 g
- BIO CELLULOSE Green Tea MASK (Item no.: 8228.061)

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 or 110 V/50-60 Hz
- Dimensions: W 17.4 cm/H 6.65 cm/D 19.0 cm
- Weight: 1.07 kg

OUR TOP TREATMENT TIP

We recommend using the COMBINE peeling powder in combination with the CLEAN neutralising toner for the AQUAPEELING programme. The device and the innovative oxygen technology in the products work in synergy to achieve unbeatable effects deep into the pores and the customer's complexion will be noticeably refined.

EXCLUSIVE LINE

IONTO-SONO Intense III

*High-frequency ultrasound with 1 and 3 MHz frequencies
- for visibly effective treatment.*

MADE-TO-MEASURE PROGRAMMES

We have developed 30 user-friendly programmes for different skin types with animated treatment processes. Each programme shows the treatment area and the direction in which the ultrasound probe must be used. The right programme can be launched quickly and easily when the appropriate skin type has been selected.

ERGONOMIC DESIGN MAKES OPERATION EASY

The angle of the display can be adjusted so the device

can be positioned as desired, and the display can be read and viewed from different perspectives without a problem. Body and facial treatments can thus be administered trouble-free.

Micro-massage and toning are non-invasive and generated through thermal, mechanical and physiological effects, free from side effects.

ITEM NO.: ATTACHMENTS TO BE ORDERED SEPARATELY

9223.93 Sensitive 2 ml vials, pack of 10

9223.92 Hydro 2 ml vials, pack of 10

INFORMATION AT YOUR FINGERTIPS

Information and videos about ultrasound treatment and how it works can be accessed at any time. A detailed treatment guide and FAQs about the device are also available so you can get quick answers to any questions you may have.

WHAT HAPPENS?

- Skin becomes firmer
- Collagen synthesis is given a boost
- Micro-massage
- Blood flow increases
- Skin metabolism is boosted
- Infiltration deep into the skin

EXCITING OPTIONS FOR COSMETIC COMBINATIONS:

Use the bio-cellulose masks from the PROFESSIONAL CARE series in line with what the customer's skin needs. A contact medium is no longer required if the masks are used.

WHAT'S INCLUDED?

- IONTO-SONO Intense device
- Ultrasound handpiece 1 MHz + 3 MHz, coverage of approx. 2.5 cm²
- Ultrasound handpiece 3 MHz + 10 MHz, coverage of approx. 2.0 CM²
- SONO contact gel, basic, 250 ml
- Ultrasound customer information sheets, pack of 25
- Treatment guide: 1800.B031 (handed out during professional training)
- Ultrasound professional training

TECHNICAL SPECIFICATIONS

- Electrical connection: 230 or 10 V/50-60 Hz
- Dimensions W/H/D: 36cm x 36cm x 24cm
- Weight: approx. 6.5 kg

Efficacy
scientifically proven

EXCLUSIVE LINE

IONTO-SONO Intense X

The high 10 MHz frequency makes it possible to intensively treat the top layers of the skin in a way that cannot be paralleled. The use of all frequencies (1, 3 and 10 MHz) enables all layers of the skin to be treated with the ultrasound-specific mode of action.

MADE-TO-MEASURE PROGRAMMES

We have developed 30 user-friendly programmes for different skin types with animated treatment processes. Each programme shows the treatment area and the direction in which the ultrasound probe must be used. The right programme can be launched quickly and easily when the appropriate skin type has been selected.

ERGONOMIC DESIGN MAKES OPERATION EASY

The angle of the display can be adjusted so the device

can be positioned as desired, and the display can be read and viewed from different perspectives without a problem. Body and facial treatments can thus be administered trouble-free.

The combination of the three frequencies means you have a range of treatment concepts for effective facial and body treatments!

EXCLUSIVE LINE

IONTO-SONO Effect

The top model with the addition of patented LDM technology (1, 3 and 10 MHz, LDM) for releasing even skin fibres that are firmly bonded together through local massage with rapid frequency changes

ONE OF ITS KIND IN THE WORLD:

In contrast to conventional ultrasound devices, the IONTO-SONO Effect works with 3 different frequencies and Local Dynamic Micro-massage (LDM) too.

an extremely rapid change in ultrasound frequencies during treatment has led to a new type of micro-massage. For the first time, the benefits of individual frequencies can be combined in one single treatment, strengthening the effects of conventional ultrasound treatment and producing outstanding results that cannot be paralleled.

LOCAL DYNAMIC MICRO-MASSAGE:

BENEFITS

Unique: 10.3 and 1 MHz ultrasound and local dynamic micro-massage (LDM).

Hygienic: high-tech ultrasound handpieces made of high-quality titanium that can be disinfected, featuring skin contact detection and an ergonomic design.

Intelligent: easy menu navigation via a digital display

Perfectly prepared: 14 programmes for face and body, 2 different built-in ultrasound handpieces. Parameters can be individually adjusted for maximum treatment flexibility. There is the option of adding on a 5.0 cm² ultrasound handpiece for body treatments.

ITEM NO.:	ATTACHMENTS TO BE ORDERED SEPARATELY
8432.003	Ultrasound handpiece, 5 cm ² , 1 MHz + 3 MHz, for body treatments
1800.A011	Ultrasound customer information sheets, pack of 25
1800.B036	Ultrasound treatment concept, 1 piece

ITEM NO.:	CARE PRODUCTS TO BE ORDERED SEPARATELY
8422.026	SONO aloe vera contact gel, 500 ml
8422.025	SONO neutral contact gel, 500 ml
8422.016	SONO basic contact gel, 500 ml
9211.20	CLEAN cleansing foam, 150 ml
9211.24	COMBINE 5% fruit acid peel, 50 ml
9211.25	COMBINE 10% fruit acid peel, 50 ml
9211.29	COMBINE peeling powder, 75 g
9211.16	CLEAN neutralising toner, 500 ml
8228.089	Bio cellulose collagen mask, pack of 10
9211.41	HYDRATE active ingredient concentrate, 50 ml
9211.32	HYDRATE eye gel, 50 ml
9211.37	HYDRATE cream, 200 ml
9223.91	Anti-ageing 2 ml vials, pack of 10
9223.93	Sensitive 2 ml vials, pack of 10
9223.92	Hydro 2 ml vials, pack of 10

10 MHZ TECHNOLOGY:

The use of 10 MHz ultrasound works specifically on the top layers of the skin and can regulate inflammatory processes and improve the structure of the areas of skin targeted. This makes it the go-to for treatments which are almost crossing the border into the medical field, targeting acne and acne scars, as well as having 3D anti-ageing and lifting effects.

USES

- Skin rejuvenation and firming
- Acne and acne scars
- Care before and after aesthetic plastic surgery
- Pre-treatment for fillers and injections
- Cellulite
- Stretch marks

WHAT'S INCLUDED?

- IONTO-SONO Effect device
- Treatment probe 1 + 3 MHz/2.5 cm (8432.002)
- Treatment probe 3 +10 MHz/1.2 cm (8432.001)
- 1 x SONO contact gel, 250 ml (8422.016)
- Cleansing foam, 150 ml, Kabi (9211.20)
- Neutralising toner, 500 ml, Kabi (9211.16)
- 5% fruit acid peel, 50 ml, Kabi (9211.24)
- ULTRASOUND information sheet, pack of 25 (1800.A011)

TECHNICAL SPECIFICATIONS

- Voltage: 230V/50-60 Hz
- Weight: 8 kg
- Dimensions H/W/D: 17.2 cm/42.0 cm/27.0 cm

PROFESSIONAL CARE

EFFECTIVE CARE PRODUCTS FOR SHEER BEAUTY

Developed for use with cosmetic equipment

We see it as our duty to enrich the technology we have developed with suitable products which work in perfect harmony with the equipment. Tolerability, efficacy and compatibility are at the heart of our concept. We deliberately refrain from using substances that are not good for the skin, thus creating a natural care experience.

What your skin needs is important to us

We took great care and channelled all our efforts into selecting our ingredients. The active substances are innovative and have been used in optimal concentrations to enrich our professional skincare range. Scientific studies have proven them effective and confirmed their physiological effects on the skin. Your skin's health matters to us — our aim is to understand what your skin needs and meet these needs in full.

FREE FROM

- Paraffins
- Parabens
- Silicones
- Dyes
- PEGs
- Fragrances

Friendly to skin

When it comes to our professional product series, we do not use parabens and we only employ the minimum amount of alcoholic preservatives required. We do not use any fragrances or perfumes that generally have a high allergic potential and are of no benefit to the skin. We also refrain from using dyes which beautify the product alone and not your skin, and you won't find any PEGs in our products either. The high-quality care product series does not contain any cheap raw materials, such as silicones, mineral oils or plasticisers. Our products are dermatologically tested for tolerability and offer skin-friendly yet highly-effective skincare.

Efficacy

Your customers' skin deserves only the best. This is why we value effective combinations of active substances that are natural and unaltered. The effects that pure, active substances have on the skin have been proven in scientific studies.

Compatibility

The PROFESSIONAL CARE product series has profound effects, particularly when used in combination with cosmetic equipment. IONTO-COMED technology, such as ultrasound, radio frequency, micro-needling and micro-dermabrasion, work in synergy with the products and treatment results last longer.

Enriched with an oxygen boost formulation that releases oxygen, making cleansing both thorough and gentle. The synergistic effects between zinc, copper and magnesium activate cell metabolism and neutralise the free radicals that can form on the skin as a result of air pollution.

→ **High tolerability, cleansing is invigorating and thorough**

1 OXYGEN TECHNOLOGY

The oxygen released ensures that skin is thoroughly cleansed and gently removes the fine dirt particles caused by air pollution.

2 MAGNESIUM

The trace element acts as a catalyst for cleansing and stimulates cell metabolism.

3 ZINC

This substance ensures that contaminants are properly removed.

4 COPPER

This mineral acts as a free radical scavenger and thus counteracts the skin ageing process.

PRODUCT	ACTIVE SUBSTANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
CLEANSING FOAM	<ul style="list-style-type: none"> · Oxygen technology · Magnesium · Zinc · Copper 	The gentle, velvety cleansing foam does not disintegrate immediately and consists of carefully-selected surfactants which are kind to skin, cleansing it thoroughly and gently.	All skin types	Shake the product, apply 1-2 pumps of foam to moist palms and then apply to the face. Wipe off thoroughly with a warm compress or cosmetic sponge.
NEUTRALISING TONER	<ul style="list-style-type: none"> · Oxygen technology · pH buffer system 	The facial toner is specifically designed to restore the skin's natural pH value as quickly as possible after cleansing or peeling. It helps preserve the skin's natural protective barrier.	All skin types	<p>After cleansing, add 1-2 pumps of the facial toner to a cotton pad and spread generously over the face.</p> <p>After one of our fruit acid peeling treatments: repeat the process twice. Make sure that every area of skin which had the fruit acid peel applied is sufficiently wetted with neutralising toner. Then thoroughly rinse skin with water by wiping over with a moist compress or sponge.</p>

These products are based on substances known to the skin, composed of active ingredients that are largely produced by the body itself or are even components of the skin itself.

→ **High tolerability, optimal skin regeneration through ingredients known to the skin**

- 1 HYALURONIC ACID
- 2 AMINO ACIDS
- 3 UREA
- 4 ALLANTOIN

ACTIVE SUBSTANCES

1

HYALURONIC ACID

This is a natural, sugar-like molecule that is present between cells and produced naturally by the body. As skin ages, the skin's own hyaluronic acid production decreases and the spaces between cells become less plump. This results in a loss of the skin's viscoelastic properties. The hyaluronic acids used in the HYDRATE line are short- and long-chain and therefore have a multi-dimensional effect: while short-chain hyaluronic acid restores moisture deposits deep down, long-chain hyaluronic acid settles on the skin's surface and visibly fills in any small wrinkles caused by dryness.

→ **Fills in wrinkles caused by dryness, improves the skin's elasticity and tone, plumpens the skin with moisture deposits**

2

AMINO ACIDS

Our skin's NMF (Natural Moisturising Factor) consists largely of amino acids. By adding natural amino acids which are unchanged in structure, the HYDRATE line improves the composition of our natural NMF and thus restores the skin's barrier. Amino acids stimulate regenerative processes inside cells, resulting in a positive effect on collagen formation in the skin.

→ **Prevents moisture loss from skin, supports the skin's barrier, triggers regenerative action from within**

3

UREA

Urea is able to store many times its own weight in moisture. It can therefore — in the right concentration — curb transepidermal water loss from the skin and prevent signs of dryness.

→ **Creates soft skin, plumper skin, fills in wrinkles caused by dryness**

4

ALLANTOIN

Allantoin alleviates skin irritations, promotes cell regulation and is generally considered to be extremely tolerable. It makes dry, rough skin smooth and supple.

→ **Soothes, counteracts irritations, regulates cells**

PROFESSIONAL
CARE

ACTIVE SUBSTANCE CONCEPT HYDRATE

PRODUCT	ACTIVE SUBSTANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
 HYDRATE ACTIVE SUBSTANCE CONCENTRATE	<ul style="list-style-type: none"> · Hyaluronic acid (long chain) · Hydrolysed hyaluronic acid (short chain) · Amino acids · Lactic acid · Urea · Allantoin 	The liquid active substance concentrate can penetrate very deep into the skin thanks to its molecular properties. It actively binds moisture in the upper layers of the skin and fills in lines and wrinkles from within.	Dry skin	Apply 1-2 drops of the concentrate directly onto the face, then massage into the skin, applying light pressure. Always apply the concentrate to the skin before using a cream/mask.

PRODUCT	ACTIVE SUBSTANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
 HYDRATE EYE GEL	<ul style="list-style-type: none"> · Hyaluronic acid (long chain) · Hydrolysed hyaluronic acid (short chain) · Amino acids · Fructose · Pullulan · Urea · Allantoin 	This moisturising eye gel refreshes tired and dry areas around the eye and leaves the skin feeling smooth in the long term.	Dry skin	Apply the eye gel under the eye as needed and rub in from the inside out. Top tip: the product can be stored in the refrigerator for a cooling effect.

PRODUCT	ACTIVE SUBSTANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
 HYDRATE CREAM	<ul style="list-style-type: none"> · Hyaluronic acids (long chain) · Hydrolysed hyaluronic acid (short chain) · Glycerin · Amino acids · Coconut extract · Urea 	This fast-absorbing moisturiser resolves any tightness over the long term and leaves skin feeling weightless, extremely soft. It restores the skin's natural barrier and minimises transepidermal water loss.	Dry skin	Apply 1-2 pumps of the cream to the fingertips and then apply generously over the face. Top tip: 1-2 drops of the HYDRATE active substance concentrate can be mixed into the cream if desired.

The idea behind the COMBINE line is that all products can be used in combination with each other — tailored to a customer's individual skin needs — and therefore all skin needs are covered.

→ **It works like a modular system: you can put together a selection of peels, vials or masks for your own treatment concept.**

FRUIT ACID PEELS

The chemical peels contain two AHA acids (alpha hydroxy acids*), which exfoliate and refine the skin in a keratolytic process**, reduce impurities, minimise wrinkles and boost the skin's radiance. The fruit acid peels are all-rounders and can be incorporated into your treatment concepts as required.

→ **Renews cells, refines skin, boosts radiance**

1

GLYCOLIC ACID

The molecule obtained from sugar cane is small and water-soluble (hydrophilic) and has a strong keratolytic (peeling) effect.

2

MANDELIC ACID

This substance evens out skin tone and can also successfully combat impurities.

PRODUCT	ACTIVE SUB-STANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
5% & 10% FRUIT ACID PEELS	<ul style="list-style-type: none"> · Glycolic acid · Mandelic acid · pH ≤3 	Optimises the skin's overall radiance: improves skin impurities, reduces the appearance of first fine lines and removes excess skin cells. Pigment alterations are minimised. Also suitable for use by customers at home.	Atrophic, impure and dry skin, and skin prone to hyperpigmentation (not suitable for hypersensitive skin)	Add 1-2 drops of the fruit acid peel into a small bowl, then apply a thin, even layer over the face with a brush. Avoid the mouth and eye areas. After 3-4 minutes, neutralise the skin with the CLEAN neutralising toner. Then cleanse with a moist compress so that any peel residue is removed and there is no longer any kind of tingling sensation on the skin.

*Alpha hydroxy acids = carboxylic acids that have a hydroxy group (-OH) positioned on their alpha carbon. These acids are usually obtained from fruits and have skin-peeling effects.

**Keratolytic = removes calluses

PROFESSIONAL
CARE

ACTIVE SUBSTANCE CONCEPT COMBINE

PEELING POWDER

1

PAPAIN

This is obtained from papaya and breaks intercellular connections, thus efficiently removing the upper layers of the skin.

2

RICE STARCH

Rice starch has an absorbing effect and gently absorbs any detached skin cells and impurities on the skin's surface.

3

VITAMIN E

This smooths skin and has an anti-oxidising effect. Vitamin E therefore also acts as a free radical scavenger and prevents the extrinsic skin ageing process (caused by external factors).

The fine powder contains enzymes which are in a kind of beauty sleep. They only produce their effect when activated with water.

→ Deep pore, gentle, enzyme-based peel

PRODUCT	ACTIVE SUBSTANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
PEELING POWDER	<ul style="list-style-type: none">· Papain· Rice starch· Vitamin E	Fine enzyme-based peeling powder for gentle yet effective removal of impurities on the skin's surface — ensures a complexion that has been cleansed deep into the pores.	All skin types	Pour a teaspoon-sized amount of powder (approx. 1 g) into a bowl and add the CLEAN vial, CLEAN toner or a little water. Use a brush to mix and create a lather. Massage in the peel for approx. 3 minutes using the IONTO-Peel or a similar massaging scrubber. Then rinse and remove with a compress, cosmetic sponge or lukewarm water and neutralise with facial toner.

PROFESSIONAL
CARE

ACTIVE SUBSTANCE CONCEPT COMBINE

SUN PROTECTION FACE CREAM WITH SPF 50+

1

HYALURONIC ACID

Hyaluronic acid is found in the human body and is an important component of various tissues. It ensures soft, smooth skin thanks to its ability to bind water.

2

ECTOINE

This increases the amount of moisture in the skin's cells and thus reduces wrinkles and smooths and regenerates skin.

3

ARGININE

An amino acid that occurs naturally in the skin, serves as a moisturiser and supports the skin's barrier function.

4

VITAMIN E

Vitamin E supports skin regeneration and protects against free radicals.

Using sun protection factor 50 + offers optimal protection against premature ageing as a result of UV and is particularly suitable for using after receiving treatment with cosmetic equipment. A real all-rounder with high tolerability.

→ **Moisturising, waterproof and soaks in fast without leaving a tacky film behind**

PRODUCT	ACTIVE SUB- STANCES	BENEFITS	SKIN TYPE	INSTRUCTIONS FOR USE
SUN PROTECTION FACE CREAM WITH SPF 50+	<ul style="list-style-type: none">· Ectoine· Hyaluronic acid· Arginine· Vitamin E	<p>This SPF 50 + face cream nourishes and regenerates the skin.</p> <p>It can be used as a day cream or in combination with other products.</p> <p>What's more, the cream does not affect hormonal balance and is also reef-friendly.</p>	All skin types	Apply 1-2 pumps of the cream to your fingertips and then apply evenly over the face.

**BENEFITS:**

- ✓ Waterproof, soaks in fast
- ✓ Contains vitamin E, ectoine and hyaluronic acid
- ✓ Nourishes and regenerates
- ✓ Gives the skin exactly what it needs after treatment
- ✓ Soaks in quickly without leaving a tacky film behind
- ✓ Can be easily used in combination with other products
- ✓ Can also be used as a day cream
- ✓ No impact on hormonal balance
- ✓ Reef-friendly

BIO CELLULOSE FACE MASKS

BIO CELLULOSE

The high-quality material used for the bio cellulose masks contains the finest organic natural fibres. They are fermented from coconut and form a highly breathable structure with an excellent ability to absorb active substances and then continuously release them back into the skin. The ultra-soft material sits snug to the finest contours like a second skin.

This valuable raw material is 100% biocompatible and, thanks to its structure, is able to keep the skin constantly moist whilst the mask is applied. Depending on the active substance, the focus is either on redness reduction, skin radiance, moisture, elasticity, pore minimisation or detoxification.

SHEET FACE MASKS

Face masks made from ultra-light cellulose. A sheet face mask that combines comfort and powerful active ingredients.

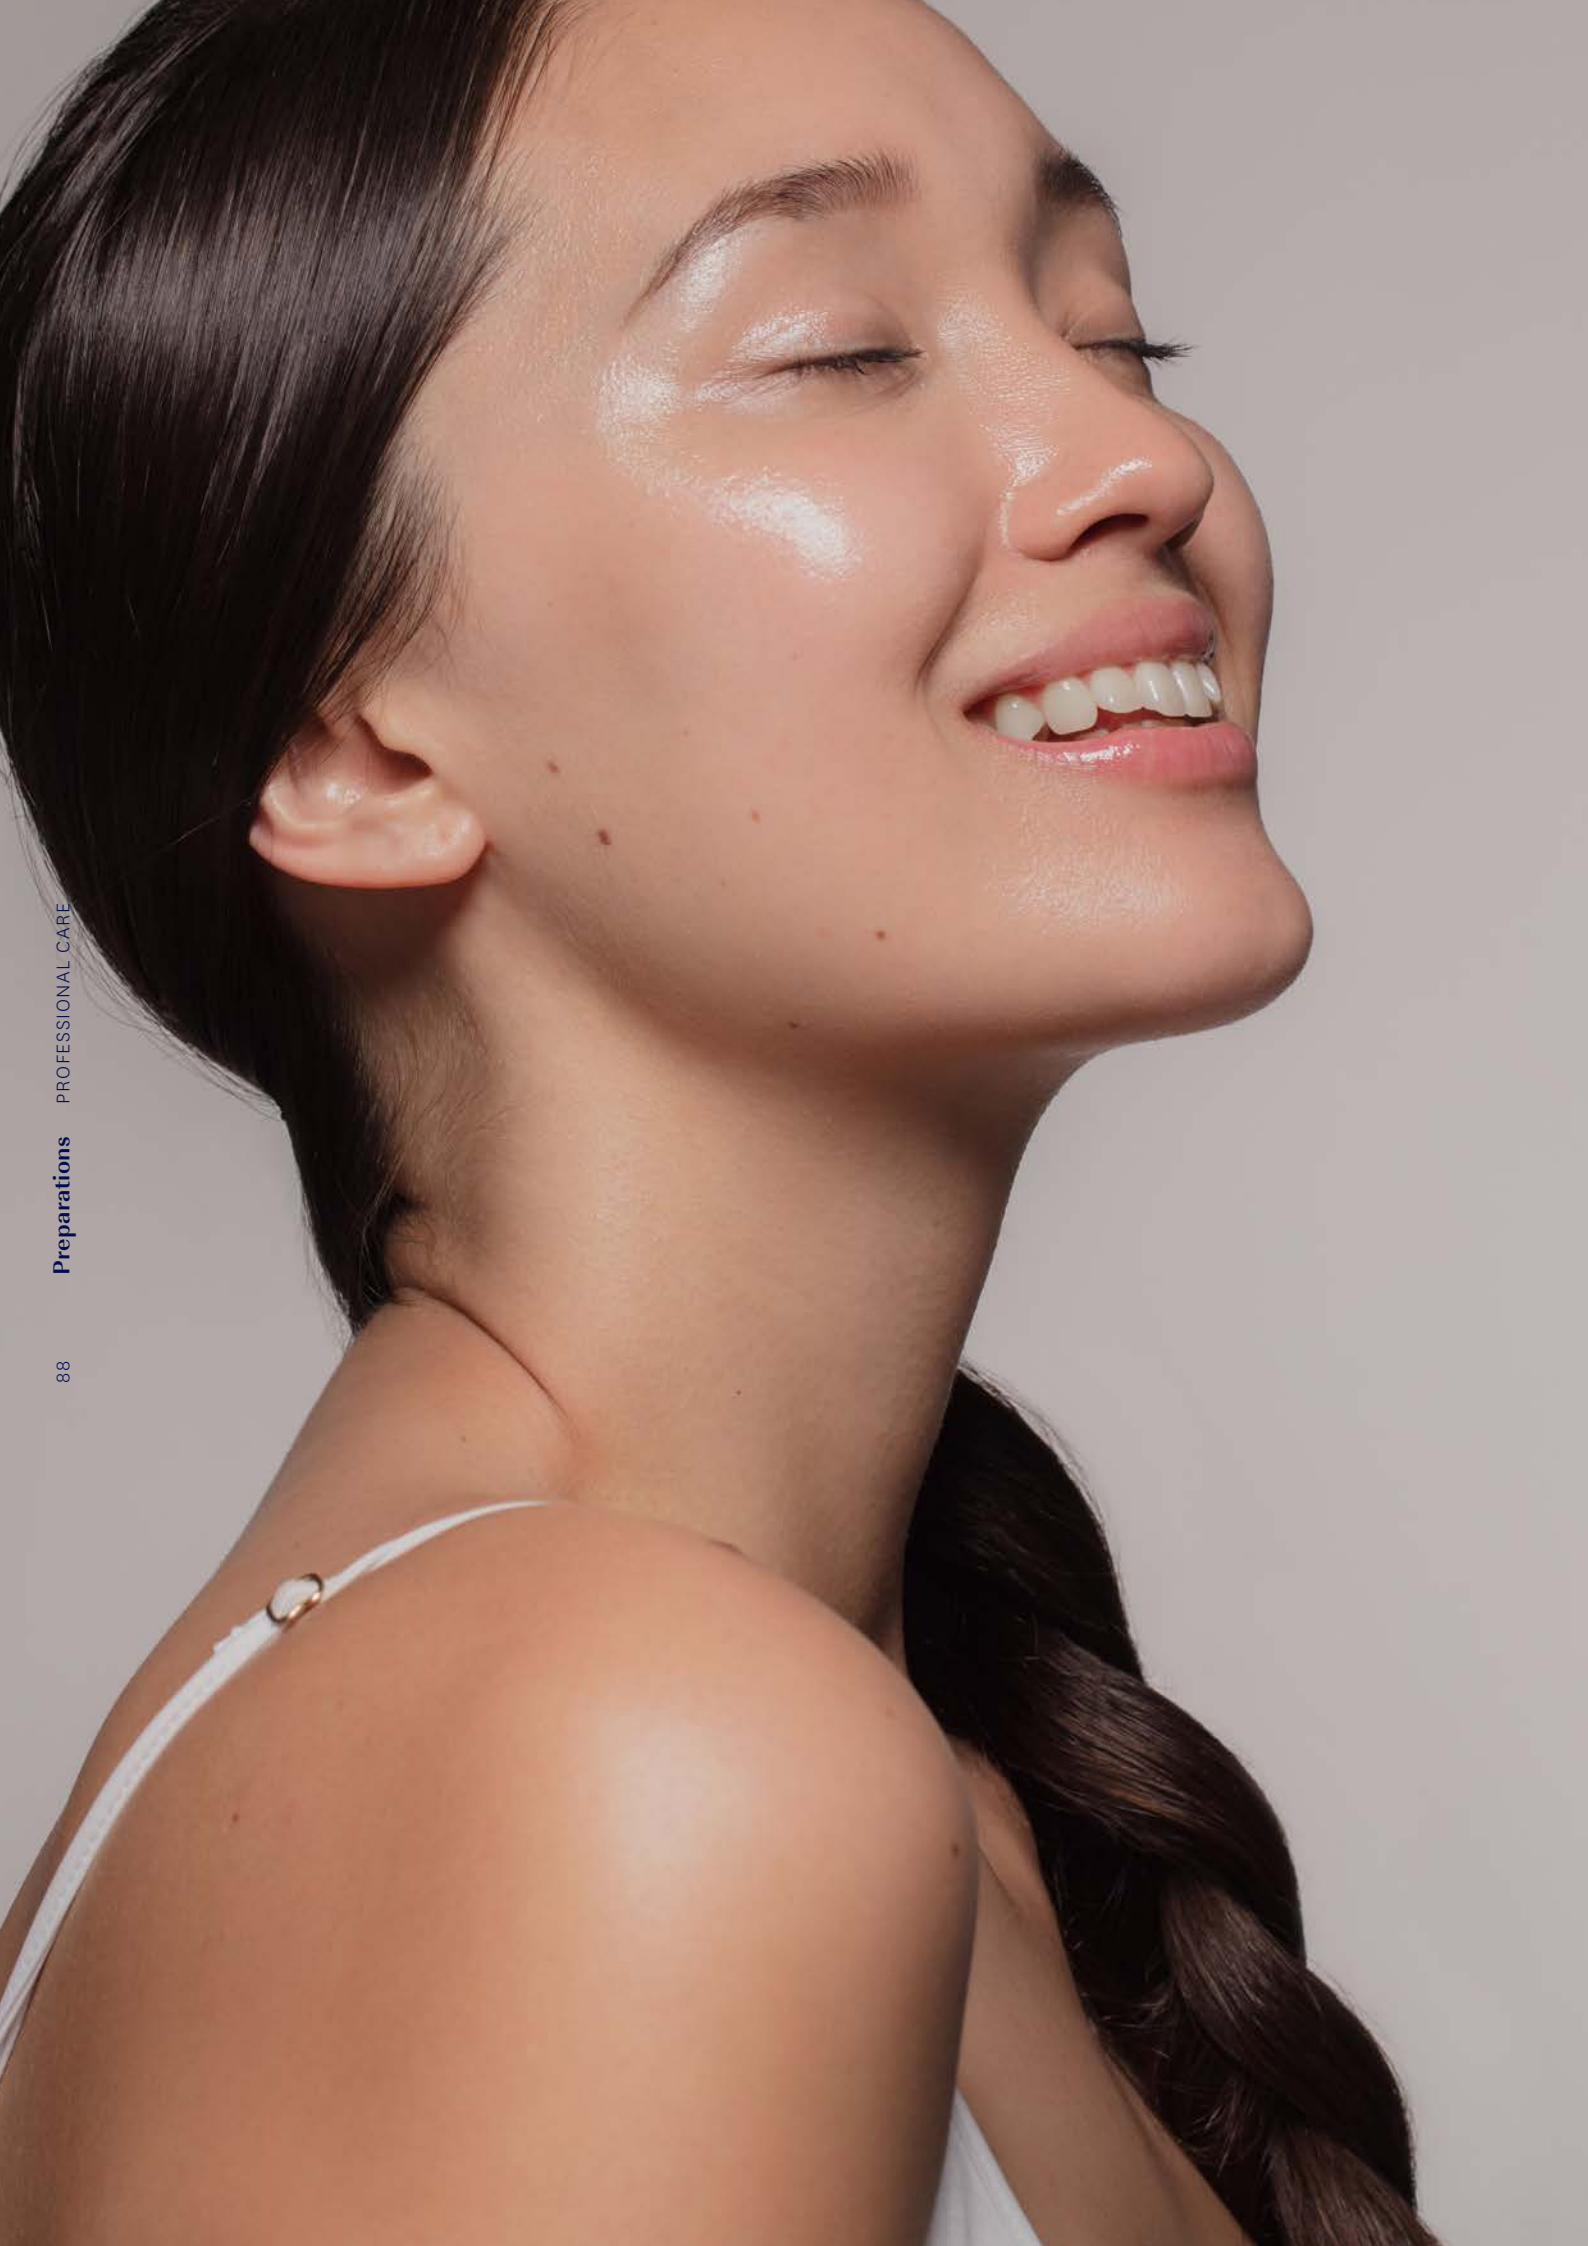

Ideal for selling to customers for use after their cosmetic treatment.

Easy to use:

Remove the mask from the packaging and take off the protective gauze. Apply the mask to the entire face, spreading it on firmly starting at the chin.

Then, also starting at the chin, remove the blue protective gauze and push the mask down firmly. Leave on for 15-20 minutes.

- ② GREEN TEA
- ③ CHERRY BLOSSOM EXTRACT
- ④ Q10
- ⑤ SEAWEED
- ⑥ COLLAGEN

ACTIVE SUBSTANCE VIALS

Professional preparations of active substances have been the basis of every cosmetic treatment for some time now, whether given by hand or using equipment. They are selected depending on the customer's skin type and history to provide lasting improvement and a feeling of beautification at the same time.

Active substance vials are probably the most sought-after products with the widest range, and, due to their high concentration, are often used as small power packs for helping with a wide array of problems. The vials have seen success in practice for many years now and are constantly convincing users of their effects and particularly good price-performance ratio.

PRODUCT	BENEFITS	SKIN TYPE	APPLICATION
SENSITIVE VIAL	Increases skin elasticity, strengthens the barrier function and relieves any tightness.	Sensitive, irritated skin and neurodermitis	Can be injected with (-)
HYDRO VIAL	Compensates for a lack of moisture and regulates the skin's moisture levels.	Dry/dehydrated skin	Can be injected with (-)
OCEAN VIAL	Makes skin noticeably firmer and acts as a moisturiser and free radical scavenger.	Dehydrated, sun-damaged, mature skin	Can be injected with (+)
HYALURON VIAL	For a firmer, smoother and more even complexion. Provides the skin with sufficient moisture and helps to reduce wrinkles.	Dull, tired and mature skin	
SUPER-CLEAN VIAL	For gentle, deep pore cleansing and desincrustation.	Oily skin and skin impurities	Can be injected with (-)
PURE VIAL	Relieves skin irritation/inflammation and prevents further acne development.	Inflamed skin and acne	Can be injected with (-)
COUPEROSE VIAL	Counteracts couperose, telangiectasia and dark circles under the eyes with an immediate visible effect.	Couperose, telangiectasia and dark circles	Can be injected with (-)

Innovation, quality and chic design lead to success

Treatment chairs lay the foundations for high customer satisfaction and successful treatment. Our cosmetic, wellness and massage tables are characterised by their high quality, MADE IN GERMANY. They combine the highest in comfort with supreme functionality and provide maximum relaxation during treatment.

COSMETIC TREATMENT CHAIRS

IONTO-COMED cosmetic treatment chairs are shaped like a standard treatment chair, but feature various options for adjustment and can even be extended until fully flat. This means that they are not only suitable for cosmetic face and body treatments, but also for massages and even foot care – and offer you the greatest possible flexibility. They are particularly easy to get into, the classic armrests provide the usual comfort and make-up can be applied whilst sitting. The foot cushion can also be lowered for giving foot soaks.

The selection ranges from pre-configured models to top models that can be kitted out according to individual requirements, with an array of faux leather covers to suit your needs when it comes to comfort and appearance.

The high-quality **IONTO-Dynamove** features a first-class design with a vertical lifting post that makes for the perfect ergonomic working environment for giving treatment in the smallest space.

COSMETIC TREATMENT CHAIR

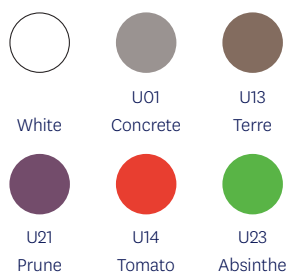

IONTO-UNIVERSAL A1

The small semi-automatic chair, for a wide range of uses

The IONTO-UNIVERSAL A1 ticks all the boxes when it comes to getting started in the field of cosmetics and foot care. Its compact dimensions mean it's suitable for providing treatment in the smallest of spaces. It's easy for customers to get into (height 51 cm) and can be adjusted to lie perfectly flat, and with its armrests, extendable footrest and standard upholstery, function and a basic level of comfort

are guaranteed. Low in weight and with castors that lock in position, the UNIVERSAL A1 easy to work with. The height can be adjusted electronically via a foot switch, and the angle of the backrest and seat can be manually changed as desired with the help of gas springs.

STANDARD COLOURS FOR ALL UPHOLSTERY

CAN BE ADJUSTED TO LIE PERFECTLY FLAT,
so this chair is also suitable for massages

FEATURES

Chair category	Semi-automatic

COSMETIC TREATMENT CHAIR

IONTO-Xtension 2.0

*An introduction to the latest generation of cosmetic chairs
with lifting post and P-arm*

IONTO-Xtension 2.0 combines first-class comfort for your customers with an appealing, timeless look and creates an ergonomic working environment for you too. The latest generation of cosmetic chairs creates a relaxing wellness experience for your customers whilst also enabling you to stay healthy whilst working. The chair features soft beauty comfort upholstery and the sub-sections can be individually adjusted, so it fits the customer's body size and contours to perfection.

You can choose it to come with heating if you so desire, it has castors so it can be easily repositioned and it is also available in different colours to suit your personal taste and the rest of your treatment room furnishings and equipment. The height is convenient for providing treatment and there is also legroom underneath, enabling a healthy working position also when giving massages.

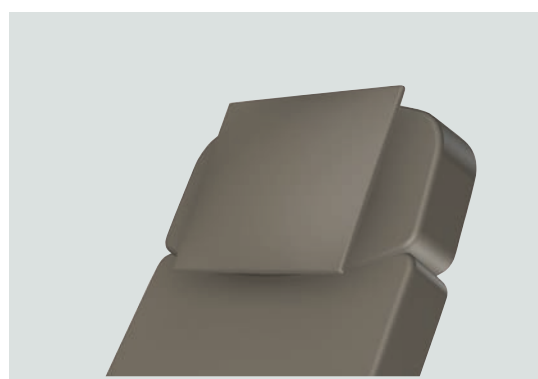

UPHOLSTERY: AN OVERVIEW

COSMETIC TREATMENT CHAIR

IONTO-DYNAMOVE C1

The start of a new generation of cosmetic chairs

The IONTO-DYNAMOVE C1 provides the highest levels of comfort for customers and an ergonomic environment for yourself, and all in the smallest space. The chair offers the stability necessary for massages and the flexibility to allow your customers to change position depending on the treatment they're receiving.

The design is based around the brand-new, high-quality lifting post, which enables the chair's height to be adjusted without any lateral misalignment, meaning that it's also suitable for use in small spaces and has countless ways of being used.

COSMETIC TREATMENT CHAIR

IONTO-DYNAMOVE C2

The latest generation: a true wellness experience thanks to soft comfort upholstery.

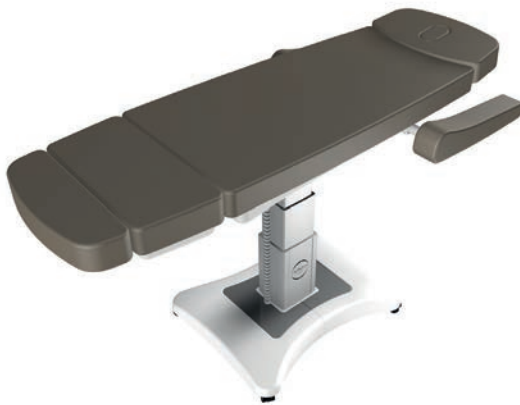

The successor to the IONTO-DYNAMOVE C1, the IONTO-DYNAMOVE C2 cosmetic chair also provides the highest levels of comfort for customers and an ergonomic environment for yourself in the smallest of spaces. With the stability and flexibility you'd expect, you can always put your customer in the correct position for the treatment they're receiving, including massages. Going one step further than the

IONTO-DYNAMOVE C1, this chair makes every treatment into a true wellness experience with its "beauty comfort upholstery" – your customers will immediately feel the difference and can sit back, relax and really enjoy their treatment. You can also choose to get your chair kitted out with castors so it can be easily repositioned at any time. The chair can be operated via wireless foot switch and also comes with an individual decorative panel too.

WELLNESS TREATMENT CHAIRS

Back in 2003, IONTO-COMED began to think about how to create a spa-like ambiance in cosmetic treatment rooms. They wanted to develop a wellness-style chair so customers could relax as if in bed when receiving their treatment. The result: mattress-standard upholstery and ground-breaking reclining adjustability. Innovative extra features, such as Soundmotion and lighting, have then gone on to be added since its inception. Designed in spa style and featuring a large base for stability, the wellness treatment chairs are ideal for massages and both holistic and cosmetic face and body treatments.

They've also been released in different designs and for a variety of treatment room concepts.

Our IONTO-SPA Sensity is one of its kind in the world. When it came to developing this range, we had a clear goal in mind: "to get away from having a variety of different chairs and move towards having one chair that allows variety in itself."

Realising this goal required concentrated work on a vast number of details and sometimes a focus on developing brand-new solutions. But we succeeded: our treatment chair is now available in different configurations all the way up to the top model featuring Soundmotion technology.

Julian La Fontaine

8175 IONTO Spa Sensity
 Model: 8175
 Year: 2020
 Serial: 12345678
 Made in Germany

UNIVERSAL WELLNESS TREATMENT CHAIR

IONTO-SPA Sensity

Our universal SPA Sensity wellness chair takes a completely new approach to combining reclining comfort with a variety of treatment options. We used our wealth of experience to start with the design from scratch and question everything we had previously taken for granted. This resulted in a chair that's exceedingly easy to set up and maintain thanks to its special lifting posts, that adapts perfectly to customers both small and tall and that creates a Z po-

sition which is exceptionally relaxing for customers during certain treatments. The foot cushion can be lowered to suit the customer and the backrest can also be adjusted up to 75 degrees, which makes it easy for customers to get on and off the chair. Some stand-out features include the storage space in the base and the highly adjustable head cushion, which gives the beauty therapist an unprecedented amount of legroom.

P. 118

IONTO-SPA Sensity

*A revolutionary synthesis
of comfort, treatment variety and storage space*

P. 126

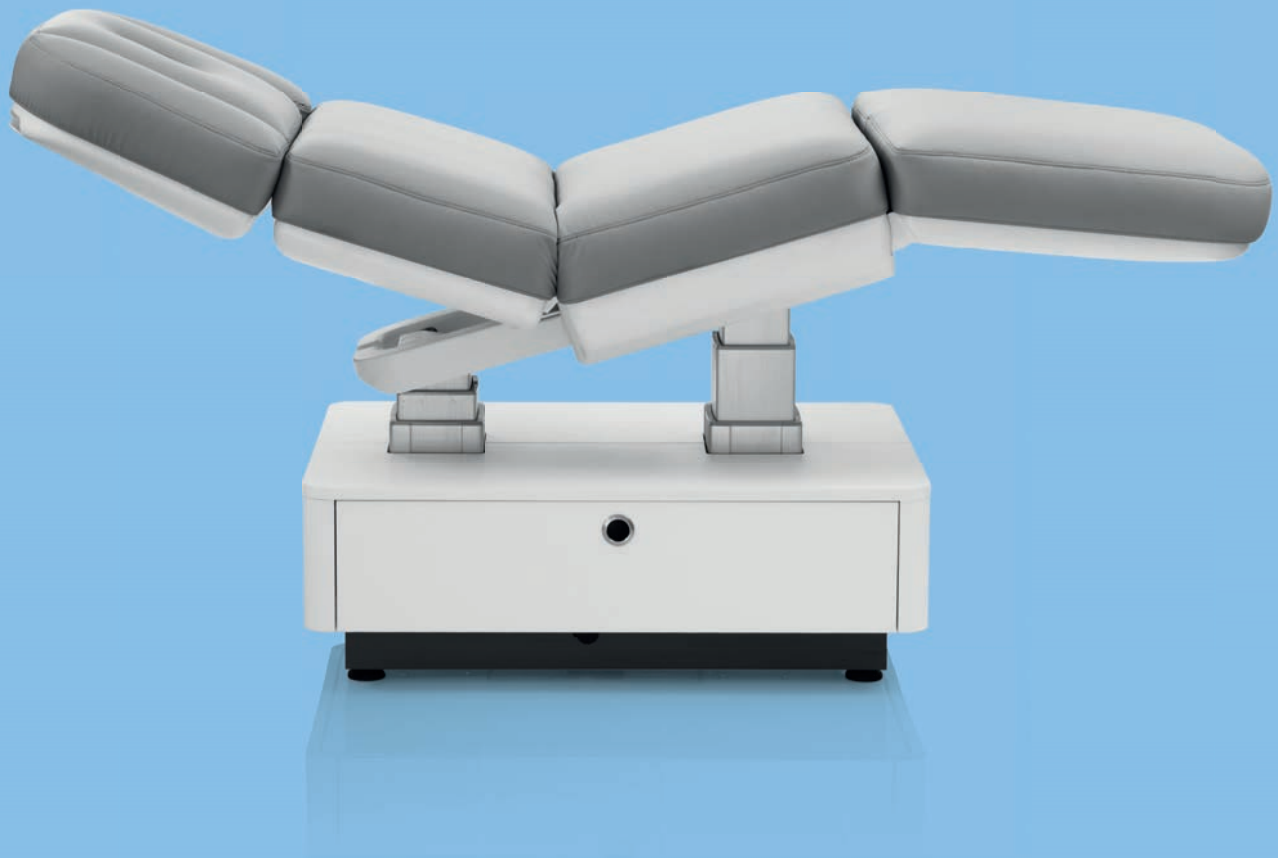

IONTO-SPA Sensity Soundmotion

*The top model with vibroacoustics controlled through sound waves, lighting and more,
for unique treatment experiences to dive into with all the senses*

P. 128

IONTO-SPA Sensity Evolution

*The top model with customisable vibroacoustics, lighting and more,
for unique treatment experiences to dive into with all the senses*

UNIVERSAL WELLNESS TREATMENT CHAIR

IONTO-SPA Sensity

*A revolutionary synthesis
of comfort, treatment variety and storage space*

This chair can be moved into countless different positions, creating not only comfort, but also an ergonomic working environment. The armrests and entire head cushion can be moved and adjusted to create legroom as beauty therapists have never known it before. The armrests are also designed to slope forwards, giving the customer's hands some gentle support during back treatments.

As a practical addition, the base includes storage space for covers and towels and there's an option to add castors too. The full backrest casing not only completes the look, but also makes hygiene straightforward. What's more, the chair is easy to set up in line with the "plug and play" principle and cushions can be mounted with a simple click, and even individually replaced.

Demands are increasing in the field of wellness treatments

CREATE A UNIQUE EXPERIENCE

Whether spa, hotel or beauty clinic – nowadays, providers of high-quality wellness treatments need sophisticated concepts that are highly effective and guarantee a unique experience to satisfy discerning customers. Combining a wide variety of treatment packages with exceptional stand-alone services and a distinctive environment for relaxation and well-being is a recipe for long-lasting success.

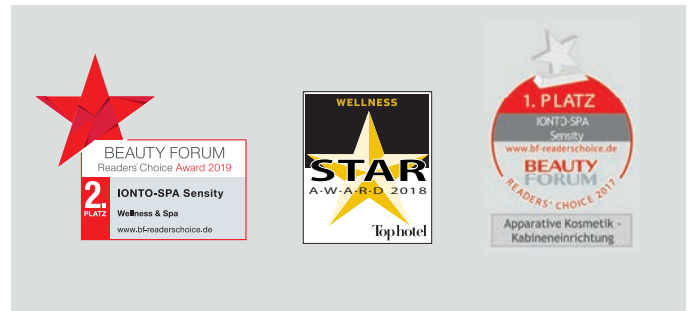

COMBINE COMFORT AND FUNCTIONALITY

For this you need to have the right equipment, featuring reliable technology and fitting seamlessly into your treatment concept in terms of form and design.

The IONTO-SPA Sensity combines the advantages of a standard treatment chair with reclining functionality. The design is based around the flawless interaction between the two newly-developed lifting posts with the three separate cushion elements, so the chair can be adapted and moved into countless different positions. This, in combination with the adjustable head cushion, means that every customer can find a comfortable lying position, no matter their height, and really enjoy their treatment. The armrests are also easier to adjust, especially when the customer is lying on their stomach, and for the first time, the foot cushion can be lowered to make the chair more convenient to get into.

STANDARD HEAD CUSHION WITH NOSE HOLE PLUG

ENSURE FLEXIBILITY AND EFFICIENCY

Wellness chairs should provide the necessary flexibility for a wide range of treatments, especially in view of the trend towards universal treatment rooms: the more different treatments are carried out in one room, the more important it is for the chair and all the room furnishings to be able to deal with complex procedures and enable a smooth, efficient way of working. And, of course, high safety and hygiene standards must always be guaranteed, including in innovative practices and processes.

The IONTO-SPA Sensity makes providing treatment more straightforward than it has ever been, with more legroom and easy access to the face during facial treatments, even for smaller individuals, as the chair can be more precisely adjusted to the height of the beauty therapist. It is operated via remote control, and there are three buttons with pre-configured setups, which can also be reassigned if desired. This way, the IONTO-SPA Sensity simplifies processes and enables the therapist to concentrate on what matters: treating the customer.

What's more, the IONTO-SPA Sensity does not require servicing thanks to the lifting posts and the drives used to power them, and to top it off, the upholstery can be easily replaced - guaranteed.

IONTO-Soundmotion

*IONTO Soundmotion technology – the key
to listening with your whole body*

"The clock in our diencephalon controls our body's fundamental frequencies. If this internal clock doesn't work properly, it's like a big orchestra having to play without a conductor and every musician doing what they want. Music, however, can be used to synchronise our rhythm."

DR. ALEXANDER WUNSCH

is a doctor of medicine and expert in the field of vibrational medicine. He has many years of experience in using light and sound as part of therapy and is a lecturer at the Hochschule Wismar, University of Applied Sciences.

RELAXATION AND TENSION RELEASE WITH VIBRATIONS FROM MUSIC

Life demands a lot from us nowadays: we have to process a lot in a short space of time both in and outside of work, and we often have to perform complex tasks at a fast pace. If we're permanently tense and don't take the time to relax, we can become physically exhausted due to the constant release of stress hormones, which is the first sign of potential burn-out or depression.

USE MUSIC TO CREATE HARMONY WITHIN

The basis of every successful wellness concept is listening to what the body needs. The body, by nature, is a complex system made up of different rhythms: from the lightning-fast reactions of the nervous system, to your heartbeat and breathing, through to the alternation between sleeping and waking, the frequencies of bodily processes are organised according to the same harmonic principles as music. However, these rhythms, dependent on each other for harmony, are sensitive and can be disrupted.

Your body and mind adapt to the challenges life throws at you by releasing hormones and increasing pulse rate and blood pressure, as well as the supply of energy and oxygen. Every stage of tension and stress must then be followed by a period of rest and relaxation so that your body remains healthy and responsive.

Using music in treatment can work wonders for this: its rhythms and vibrations bring your body and soul back into harmonious balance.

TAPPING INTO MULTIPLE SENSES – THE CONCEPT

IONTO-Soundmotion combines music and vibrations to activate two senses in one unique, soothing experience. There are few other forms of communication that are able to express feelings and moods in a way that's as nuanced and as pure as music. It can help us to access our emotions, with rhythm and vibrations to help us relax and rejuvenate ourselves and sounds to make us feel secure or get us ready for action.

In this way, we can restore order to our body's rhythm.

"HEAR" WITH YOUR WHOLE BODY AND BECOME MORE MINDFUL

Not only can you hear music with your ears, but you can also "feel" it on your skin and let it flow throughout your whole body. The bass, in particular, can be felt through vibrations both on your body and inside it too. IONTO-Soundmotion divides the sound spectrum and transmits the relevant parts of the music to special vibration generators, which translate sounds into vibrations and oscillation patterns, creating a brand-new musical experience.

FIND THE OPTIMAL SETTING

Music is transmitted to the chair via cable or Bluetooth, from an MP3 player, mobile phone or tablet, for example. The volume and intensity of the associated vibrations can then be controlled either via a control panel attached

to the side of the chair or, in the case of the IONTO-SPA Evolution, via a Soundmotion APP.

There is an array of options to choose from to create an experience tailored specifically to the user. There are pieces of music already installed for you to use or you can choose any other music you like. The patterns of movement created by the vibrations and the treatment duration can be set individually, so you can tailor treatment to be relaxing, energising or harmonising, depending on what you require.

IONTO-SOUNDMOTION AND LIGHTING TAP INTO A 3RD SENSE

Coloured, pulsating light is emitted from the base of our top model, the IONTO-SPA Evolution, bathing the room in colour to transport the customer far away from everyday life. The indirect lighting intensifies the musical experience and helps create a relaxing ambiance. Tapping into the different senses in this way fosters mindfulness and opens the mind too.

IONTO-SOUNDMOTION

The effects of vibroacoustics on the body as a whole

→ IONTO Soundmotion technology plays music via the chair's built-in head speakers and translates it into vibrations across the entire chair, relaxing and regenerating the body with long-lasting effects. Sound waves have a deeply relaxing effect on the muscles, autonomic nervous system and breathing. The volume of the head speakers can be adjusted so that only the customer receiving their treatment can hear the music.

→ Tactile corpuscles are like having ears within your skin and directly register low frequencies as vibrations, transmitting them straight to the brain. Muscles and other tissues absorb the vibrations and become relaxed, internal organs also begin to vibrate according to their own rhythm, and hollow organs such as the heart turn into resonance chambers.

→ The result: sounds and vibrations merge into one incredible ensemble. The music "gets under your skin" in the truest and most beautiful sense, increasing blood flow and improving the flow of energy within the body. The customer very quickly reaches a state of deep relaxation. There are few other treatments which are so effective.

→ The stimulation of the skin and internal organs goes deep, reducing the release of stress hormones and increasing oxytocin concentrations, also known as the "love hormone". This, in turn, increases well-being and contributes to long-lasting regeneration thanks to the impact on dopamine levels, especially with repeated treatment.

RE-FIND BALANCE AND MITIGATE THE EFFECTS OF STRESS

The effects of relaxing treatment aren't merely short-lived - they can also last longer and go deeper. Not only is music enjoyable, but it is also the most pleasurable and natural medicine for the autonomic nervous system. For example, it can harmonise the hearts of choir members, acting on the heartbeat and the emotions. It can be used to reduce the effects of stress and bring the body into a state of balance.

IONTO-SOUNDMOTION

Permanent strengthening, long-term prophylaxis

Repeated treatment with IONTO Soundmotion technology produces effects that strengthen our health over the long term and can even prevent depression.

In contrast to the usual focus on disease, salutogenesis involves research into factors that promote becoming and staying healthy. The concept of resilience also plays a role here, which describes the body's resistance to disruption, or more precisely its ability to deal with it. After all, it is this specific ability we have to restore our original potential after being put under strain that enables us to withstand the various challenges we face.

FIND BALANCE MORE QUICKLY WITH REPEATED TREATMENT

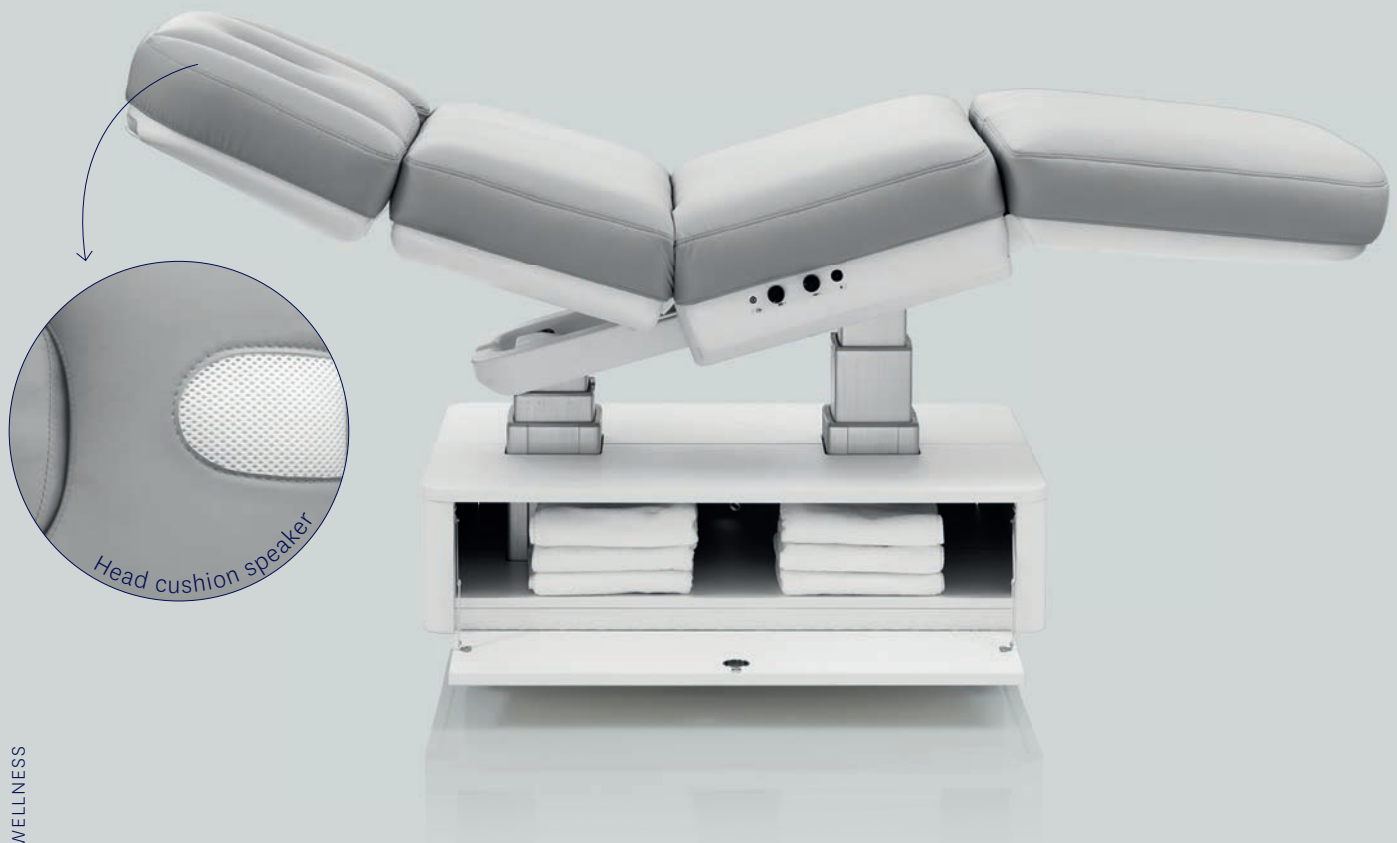

The ability to restore balance is something that can be trained, through meditation or treatment with IONTO-Soundmotion, for example. Not only does the body passively discover how it can get itself out of the dead end it was led into by excessive stress and back into a state of harmony, but it also learns that this process is possible and how it can be done. In the future, it will then be easier to call upon your own resources and strengths in times of great stress and feel the physical effects this can have.

EFFECTS ON PHYSICAL AND MENTAL HEALTH

Since stress weakens the immune system and is a cause of depression, listening to and feeling music with your whole body using IONTO-Soundmotion technology can prevent long-term health problems. If you can reduce your stress level, your immune system will be better able to fulfil its duty of fighting off threats from pathogens and your mind can remain open and expressive. IONTO-Soundmotion technology has the effect that when the customer sits on the chair, they feel instantly relaxed, their physical awareness is heightened, their autonomic nervous system becomes harmonised, their stress hormone level reduces and more oxytocin is released – all these effects work towards establishing better physical and mental health over the long term.

LIGHTING ADDS A THIRD ELEMENT TO THE IONTO-SPA EVOLUTION WELLNESS CHAIR

UNIVERSAL WELLNESSCHAIR

IONTO-SPA Sensity Soundmotion

*The top model with vibroacoustics controlled through sound waves, lighting and more,
for unique treatment experiences to dive into with all the senses*

The IONTO-SPA Sensity Soundmotion combines the unique design, high levels of comfort and ergonomics of the IONTO-SPA Sensity with the impressive Soundmotion package. The whole body is stimulated through sound waves (vibroacoustics), loosening and relaxing customers as part of a top-class wellness treatment. Vibroacoustics can resonate with a

huge variety of muscle groups and organ systems depending on the frequency.

You can also connect your room's speakers to the Soundmotion system to create atmospheric, all-encompassing sound.

UNIVERSAL WELLNESSCHAIR

IONTO-SPA Sensity Evolution

*The top model with customisable vibroacoustics, lighting and more,
for unique treatment experiences to dive into with all the senses*

Offering deep relaxation and activating 3 of your senses, our top-class equipment is now also available for the SPA Sensity: the SPA Sensity Evolution takes the basic model as a starting point, but also features temperature-controlled, highly-adaptable stretch viscose upholstery and a memory function too. A tablet for selecting music and an app for con-

trolling individual transducers to create vibroacoustic patterns or to address specific parts of the body are also available and can be ordered separately. This way, a unique treatment experience can be designed around what suits the customer and non-medical practitioners can use the technology to trigger regenerative processes.

INDIVIDUAL LIGHTING MODES

Coloured, pulsating light is emitted from the base of the SPA Sensity Evolution, bathing the room in colour to transport the customer far away from everyday life. It is well documented that colours have an impact on our soul and well-being, and lighting settings can be changed and tailored to each customer to make purposeful use of this effect.

"LISTEN" WITH YOUR WHOLE BODY

The IONTO-SPA Sensity Evolution combines music, vibrations and lighting to activate three senses in one unique, soothing experience.

Cabinets

FULL-EXTENSION PULL-OUT DRAWERS

The spacious drawers on CUBUS series products can be fully pulled out and also feature an automatic soft-closing function. They are particularly easy to clean thanks to the special plastic used on the inside.

→ See page 150 for drawer inserts

ALL-OVER UV COMPARTMENT (OPTIONAL)

To ensure seamless all-over UV exposure for the devices stored in the UV compartment and, in turn, the appropriate hygiene and safety. It allows UV radiation to reach the devices stored in the compartment from all sides.

→ *Feel free to get in touch with us for a consultation on the numerous options available to you for customising your CUBUS*

DEVICE COMPARTMENT

The device compartment provides space for cosmetic devices from the Basic and Exclusive Lines.

CASTORS

CUBUS series products are kitted out with dampened castors so you can change the position of your furnishings and secure them firmly in place too. The front wheels can be locked in position.

MAGNIFYING LAMP HOLDER

Comes at the front left and right as standard, with the cables routed into the technical compartment.

ATTACHMENT FIXTURES

Holders for a water bowl, waste bin and other attachments.

HYGIENIC SURFACES

In the fields of cosmetics and podiatry and in clinical settings, demands are high when it comes to hygiene. For this reason, the material developed for the work surfaces on CUBUS series products does not give bacteria, fungi or microorganisms anywhere to attack or grow. The DIN-tested, certified mineral surface is extra robust and easy to clean too. It's impossible for germs to stick to it and it's also able to withstand chemicals.

TECHNICAL COMPARTMENT

Products in the CUBUS Cosmetics series feature an integrated technical compartment which holds your device power cables. All your devices can be switched on and off via a single main switch on the back of the CUBUS.

TREATMENT ROOM FURNISHING

Work chairs

*A wide range of seating options for your
individual needs*

**A wide range of seating options for your individual
needs**

**It is crucial to work in a comfortable position in order to
enjoy your working day. This means that the chair you
use must be perfectly adapted to you and your work-
place. IONTO-COMED has a wide range of ideal chairs
to work from that can be tailored to meet any need.**

COMBINATION ELEMENTS

THE COMBI CHAIR RANGE

This range allows you to build your own work chair, tailored to your individual needs. You can choose between different seat and backrest designs, gas springs, footrests and castors. And as for the upholstery, you can select your colour from our 6 different standard shades. If you have a special colour request, please contact us and we'll be happy to get you a quote for this.

RECOMMENDED COMBINATIONS

ROUND CHAIR 360

The banana-shaped backrest can be rotated independently of the seat on this round chair 360. It prevents arms from getting fatigued when working in one position for long periods of time or when performing intricate work.

TECHNICAL SPECIFICATIONS

Seat diameter: 40 cm

Seat height, distance to seat surface and height of backrest can be adjusted

OPTIONS

- Only available with banana-shaped backrest.
- Standard gas spring or long gas spring, both Chrome-look finish
- Plastic or chrome-look base
- Plastic or chrome-look castors

SADDLE CHAIR

When you're in the saddle, you know you're in control of the situation, and this is how you'll feel sitting on the saddle chair, with both legs firmly on the ground.

TECHNICAL SPECIFICATIONS

Seat diameter: 40 cm

Seat height, distance to seat surface and height of backrest can be adjusted

OPTIONS

- Banana-shaped backrest, diamond backrest, trapezoid backrest, no backrest
- Standard gas spring or long gas spring, both Chrome-look finish
Plastic or chrome-look base
- Plastic castors or chrome-look castors

ROUND CHAIR

The flexible backrest comes in an ergonomic diamond shape that remains in close contact with the back at all times, so it always stays supported.

TECHNICAL SPECIFICATIONS

Seat diameter: 40 cm

Seat height, distance to seat surface and height of backrest can be adjusted

OPTIONS

- Banana-shaped backrest, diamond backrest, trapezoid backrest, no backrest
- Standard gas spring or long gas spring, both in a chrome-look finish
- Plastic or chrome-look base
- Plastic or chrome-look castors

CURVED CHAIR

The unique ergonomics of the curved chair allow you to find the perfect sitting position by giving your body the ideal amount of stability.

TECHNICAL SPECIFICATIONS

Seat diameter: 43 cm

Seat height, distance to seat surface and height of backrest can be adjusted

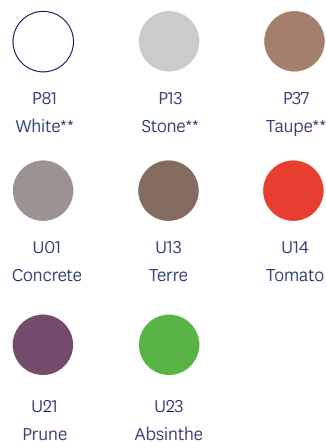

OPTIONS

- Banana-shaped backrest, trapezoid backrest, no backrest
- Standard gas spring or long gas spring, both Chrome-look finish
- Plastic or chrome-look base
- Plastic castors or chrome-look castors
